methodologies for design and production practices in interior architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture the chapters deal with four major sections the design process and interdiciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design while highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects interior designers practitioners stakeholders researchers academicians and students looking for advanced research on the new design metholodologies and processes for interior architecture the interior architecture theory reader presents a global compilation that collectively and specifically defines interior architecture diverse views and comparative resources for interior architecture students educators scholars and practitioners are needed to develop a proper canon for this young discipline as a theoretical survey of interior architecture the book examines theory history and production to embrace a full range of interior identities in architecture interior design digital fabrication and spatial installation authored by leading educators theorists and practitioners fifty chapters refine and expand the discourse surrounding interior architecture aftertaste expanded practices in interior design is an edited volume comprising texts interviews and portfolios that collectively document new theories and emerging critical practices in the field of interior design the material is informed by but not limited to the annual aftertaste symposia hosted by parsons the new school of design the book s central argument is that the field of interior design is inadequately served by its historical reliance on taste making and taste makers and more recently from a set of theoretical concerns derived from architecture the volume seeks to set an expanded frame by
advancing new voices and perspectives in both the theory and practice of interior design considered as an independent discipline in 2007 the department of architecture interior design and lighting at parsons the new school for design inaugurated an annual international symposium series dedicated to the critical study of the interior titled aftertaste these yearly symposia offer expansive views of interior studies highlight emerging areas of research identify allied practices make public its under explored territory and attract future designers and scholars to the field now in its fourth year aftertaste has proven to be one of the very few venues internationally for critically exploring interior design the field of interior design is asymmetrically served by the current literature in the field too frequently the current writing and making in interiors emphasize the ineffable the biographical and the social elite and promote a curiously unsubstantiated notion of connoisseurship as the principal basis for design other attempts to construct an intellectual agenda for the study of the interior draw heavily from architectural theory ignoring the discipline’s own specific and autonomous history aftertaste the book is intended to adjust this imbalance by introducing interior design material that is theoretically and historically situated technically grounded demographically inclusive and aesthetically adventurous interior architecture provides an in depth study of the creative and construction processes behind 30 contemporary interior designs covering a broad range of international projects the book illustrates the working methods and creative concerns of both long established and emerging international designers every stage of the project is included from the demands of the original brief through early sketches and design development to investigation of building regulations and collaboration with engineers contractors builders and suppliers each project is presented through an explanatory overview shots of production and construction processes and details of fixtures fittings customized furnishings and decoration interior architecture offers both
students and professional designers an inspiring and informative overview of how today’s major interior architectural projects are designed and built, breathtaking home designs that fit perfectly into the unique landscape of the west. Architects and designers are breaking new ground on the west coast, incorporating tested ideas with modern technologies, materials, and concepts in thrilling and sustainable designs. This collection of more than 25 inspiring residences by such renowned western architects and interior designers as Ricardo and Victor Legorreta, Tom Kundig, Jim Jennings, Steven Ehrlich, Marmol Radziner, Aidlin Darling, Paul Wiseman, Terry Hunziker, and Gary Hutton showcases large and small homes that respond to the deserts, mountains, plains, and coastlines of the west. The sculptural forms and elegant interiors are at once both urban and rural, open to the outdoors, and always contemporary, comfortable, and stylish. Zahid Sardar is a San Francisco editor and writer specializing in architecture, interiors, and design. His work has appeared in Dwell, Interiors, Interior Design, California Home Design, Elle Decor, House Beautiful, and the San Francisco Chronicle. He teaches design history at the California College of the Arts and has written several books including San Francisco Modern and New Garden Design. Matthew Millman has photographed architecture and interior design in the Western United States for the past 20 years. His work has appeared in Dwell, Architectural Digest, and the New York Times, as well as the design titles Concrete Countertops, Concrete at Home, and Model Making. Interior Design Concept combines a comprehensive introduction to design concept with a reflective examination upon the various ways it can be understood, harnessed, and implemented within interior architecture and design. The power of conceptual thinking to fuel creativity, innovation, and collaboration is evident in the use of design concept, broadly accepted as an essential component in the design process. Design concept is a notoriously elusive topic, which has until now received little critical attention. This book offers a reevaluation of current academic ideas about design.
methodologies and the nature of inspiration alongside brand new data from an international research study to help clarify what creativity really means in the modern world topics addressed throughout this text will examine the functions and definitions of design concept analyze how it may be identified and integrated within the design process investigate from where ideas for design concepts can emerge and lastly consider how ideas about them might be communicated in various ways this book offers students educators and practitioners a concise explanation of what design concept is why it plays such an integral role in the design process and how it is utilized by interior architects and designers interior architecture john kurtich garret eakin the school of the art institute of chicago increased specialization within the design professions has led to a growing separation of architecture interior design and the fine arts and limited the development of humanistic architectural space this book of ideas helps to close this gap by explaining and illustrating principles of interior architecture that are based on a spatial point of view the authors unveil the essence of ideas that generate physical form and space as well as emphasize that interior architecture must be regarded as a union of disciplines they focus on philosophical concepts that make up the history of interior architecture and juxtapose historical and modern examples to explain underlying design principles exposing the links between art architecture and interior design particular attention is given to how fusion of interior architecture with other disciplines maximizes the potential of design to provide for human accommodation comfort and pleasure key topics discussed include three dimensional development respect for the enclosing architecture sensitivity to human experience the primacy of light and color and furnishings as an extension of architecture case studies of historical contemporary and unbuilt examples reveal the reasons behind the creation of designs and the decision making that accompanied execution of these designs these examples provide
insights into key specialities such as renovation uses of the computer and adaptive reuse quotes from artists architects and designers reinforce the philosophy revealed by the studies concepts from related fields such as physics music cinema literature painting sculpture and other fields are included to clarify the creative process among the important areas addressed are the relevance of the fourth dimension as the most profound element of design how light as the quintessence of spatial definition has been used to define space by masters such as le corbusier kahn aalto and wright the evolution of retail commercial residential and hospitality space from early examples to the present the emotional character of interior space established by color how furnishings in dialogue with the enclosure provide intimate human comfort how persisting styles express the spirit of the era more than 400 photographs including 57 in color offer a stunning visual exploration of path breaking interior design ideas over the centuries far more than a history of the discipline this guide offers powerful images and provocative ideas that stimulate new ways of thinking about interior design it is an essential resource for all interior designers architects and students an outstanding reference source for practicing designers this thoroughly up to date guide to interior design provides a firm understanding of the products properties and uses of all materials it offers a refreshing synergistic approach stressing the importance of cooperation between interior designers and architects and mutual understanding of each others tools towards achieving a working and successful final project it progresses from the ground up literally looking beyond the more decorative aspects of design to study the properties and uses of both finishing materials in the design field and structural materials in the architectural field threading a theme of environmental awareness throughout i.e. recycling as ways to help cope with the growing landfill problems it goes on to cover paints and finishes and how these products have changed due to laws governing

History of Interior Design second edition covers the history of architecture, interiors, and furniture globally from ancient times through the late twentieth century. Each chapter gives you background information about the social and cultural context and technical innovations of the period and place and illustrates their impact on interior design motifs. The book highlights cross-cultural influences of styles and designs, showing you how interior design is a continuing exchange of ideas. This second edition expands global coverage to Latin American, African, and Asian cultures and integrates green design into historic developments. You’ll learn to use your understanding of the past to design for the present and find inspiration for your future designs. New to this edition: expanded discussion and new chronological organization of Latin American, African, and Asian cultures; new chapter on Islamic design; additional information on technological developments in materials, processes, and structural design; integration of green design and its historic development; increased emphasis on modern design history of interior design; studio study smarter with self quizzes featuring scored results and personalized study tips; review concepts with flashcards of terms and definitions; planners, architects, and designers can have a great impact on living environments and well-being; well-being is a natural outcome of natural living; but it is important to realize that a real and comprehensive understanding of well-being can only be achieved through the continuity of the concept to all environmental scales, starting from the biosphere and leading towards interiors; since interior space is one of the most important determinants of our everyday experiences, its role in well-being as a conscious construct needs to be the most important concern of spatial design; well-being design and frameworks for interior space is a pivotal reference source that proposes a framework including different dimensions of well-being and that discusses the
importance of each dimension through the examination of past and present living environments in an attempt to figure out the appropriate ways of thinking living and building that can lead to healthier environments and happier people factors discussed throughout the book include the history of the concept of living well the evolution of well being with age the requirements that affect well being the potentials of certain design approaches for well being the existing environments such as vernacular structures heritage buildings with specific advantages for well being changes in well being requirements interior environments with different functions such as schools and home environments and the intersections of interior design with other design disciplines this book is ideally designed for architects interior designers planners engineers administrators policymakers researchers academicians and students in this book architects interior designers and designers will find an introduction to the functions and use of nano materials specifically tailored to their needs and illustrated by numerous international project examples div in the world of interior design thousands of bits of crucial information are scattered across a wide array of sources the interior design reference specification book collects the information essential to planning and executing interior projects of all shapes and sizes and distills it in a format that is as easy to use as it is to carry you ll also find interviews with top practitioners drawn across the field of interior design fundamentals provides a step by step overview of an interiors project describing the scope of professional services the project schedule and the design and presentation tools used by designers space examines ways of composing rooms as spatial environments while speaking to functional and life safety concerns surface identifies options in color material texture and pattern while addressing maintenance and performance issues environments looks at aspects of interior design that help create a specific mood or character such as natural and artificial lighting sound and smell elements describes

schools stores restaurants workplaces healthcare facilities and the other spaces people inhabit. This guide to person centered place design shows architects, landscape architects, interior designers, and other interested individuals how to develop spaces that enrich human experience using concepts derived from rigorous qualitative and quantitative research in place advantage applied psychology for interior architecture. Applied environmental psychologist Sally Augustin offers design practitioners accessible environmental psychological insights into how elements of the physical environment influence human attitudes and behaviors. She introduces the general principles of place science and shows how factors such as colors, scents, textures, and the spatial composition of a room as well as personality and cultural identity impact the experience of a place. These principles are applied to multiple building types including residences, workplaces, healthcare facilities, schools, and retail spaces. Building a bridge between research and design practice, Place Advantage gives people designing and using spaces the evidence-based information and psychological insight to create environments that encourage people to work effectively, learn better, get healthy, and enjoy life. Designed to appeal to visual thinkers, 25 Concepts in Modern Architecture explores the fundamental ideas behind architectural design through easy-to-follow sketches, drawings, and succinct explanations. Twenty-five concepts, each of which is key to architectural design thinking, are accessibly explained by examining twenty-five different masterworks of modern architecture. For example, the concept of movement in architectural design is explained through a close look at a Le Corbusier building. Transparency is examined in Philip Johnson's seminal Glass House. Asymmetry is understood through the work of Zaha Hadid and so on through twenty-five core concepts and twenty-five of the most significant buildings of the modern era. Taking a highly visual approach, this simple yet visually powerful guide is an essential companion in the design studio and to introductory courses in

using psychology to develop spaces that enrich human experience place design matters everyone perceives the world
around them in a slightly different way but there are fundamental laws that describe how people experience their physical environments. Place science principles can be applied in homes, schools, stores, restaurants, workplaces, healthcare facilities, and the other spaces people inhabit. This guide to person-centered place design shows architects, landscape architects, interior designers, and other interested individuals how to develop spaces that enrich human experience using concepts derived from rigorous qualitative and quantitative research in place advantage. Applied psychology for interior architecture, applied environmental psychologist Sally Augustin offers design practitioners accessible environmental psychological insights into how elements of the physical environment influence human attitudes and behaviors. She introduces the general principles of place science and shows how factors such as colors, scents, textures, and the spatial composition of a room as well as personality and cultural identity impact the experience of a place. These principles are applied to multiple building types including residences, workplaces, healthcare facilities, schools, and retail spaces. Building a bridge between research and design practice, place advantage gives people designing and using spaces the evidence-based information and psychological insight to create environments that encourage people to work effectively, learn better, get healthy, and enjoy life.
