
*Service Parts Handbook 2003-06-02* the service parts planning spp solution was developed by sap in a joint effort with caterpillar and ford to address the specific planning problems of service parts this book explains the processes structures and functions of this new solution and
is targeted for project members and project managers who are involved in an implementation of SAP SPP or for users who want to gain a better understanding of the software.

**Service Parts Management** 1984-01-01 with the pressure of time-based competition increasing and customers demanding faster service availability of service parts becomes a critical component of manufacturing and servicing operations. Service parts management first focuses on intermittent demand forecasting and then on the management of service parts inventories. It guides researchers and practitioners in finding better management solutions to their problems and is both an excellent reference for key concepts and a leading resource for further research.

Demand forecasting techniques are presented for parametric and nonparametric approaches and multi-echelon cases, and inventory pooling are also considered. Inventory control is examined in the continuous and periodic review cases, while the following are all examined in the context of forecasting error measures, distributional assumptions, and decision trees. Service parts management provides the reader with an overview and a detailed treatment of the current state of the research available on the forecasting and inventory management of items with intermittent demand. It is a comprehensive review of service parts management and provides a starting point for researchers, postgraduate students, and anyone interested in forecasting or managing inventory.
