reproductive health and rights are critical topics in today's society as laws and policies are continuously debated and adjusted across the world. There are many different outlooks on these issues, and different countries have widely varying laws in place. In order to better understand where the world currently is regarding these pressing discussions, further study is needed on the status of women's reproductive rights. The research anthology on advancements in women's health and reproductive rights provides a thorough review of the current research available regarding reproductive health. The book discusses how various countries and regions are handling reproductive rights, as well as current issues women face within their reproductive health journeys, covering topics such as sexual health, gender, and pregnancy. This major reference work is ideal for nurses, government officials, policymakers, healthcare professionals, researchers, scholars, academicians, practitioners, instructors, and students.

A practical resource covering both elective and emergency procedures for the practicing vascular and endovascular clinician, this book provides medical professionals vascular surgeons, interventional cardiologists, interventional radiologists, endovascular neurologists, vascular medicine specialists, and a reference guide to the most common and accepted approach to endovascular management of peripheral vascular disease. It also addresses urgent interventions in the acute setting of the various vascular beds and covers emerging areas such as stroke intervention and endovascular treatment of pulmonary embolism and vascular trauma. Edited by a multidisciplinary team, endovascular interventions offers in-depth coverage of the field in seven parts: overview, supra-aortic intervention in high-risk patients, innominate-subclavian-carotid vertebral and intracranial interventions, interventions of the aorta, renal and mesenteric interventions, lower extremity interventions, venous disease, and vascular trauma. Each section covers the technical aspects of the procedures as well as the fundamental clinical aspects which are necessary in the evaluation of patients considered for interventions. Chapters feature illustrations, case studies, key learning points, equipment lists, and sample questions and answers which can be used for board exam practice. A practical review of vascular and endovascular medicine covering both elective and emergency procedures, illustrated templated chapters provide rapid answers to questions and include case studies, key learning points, and equipment lists. It includes sample questions and answers that are handy for board exam practice. Edited by multidisciplinary experts, endovascular interventions is an excellent review book for all practicing and aspiring vascular and endovascular specialists.

this book examines military and civilian actors in international interventions and offers a new analytical framework to apply on such interventions while it is frequently claimed that success in international interventions hinges largely on military civilian coherence cooperation has proven challenging to achieve in practice this book examines why this is the case by analysing various approaches employed by military and civilian actors and discussing the different relationships between the intervening actors and those upon whom they have intervened the work analyses different military concepts such as peacekeeping and counterinsurgency and the often troubled relationship between the humanitarian and military intervening actors it presents a new analytical framework to examine these relationships based on identification theory which illuminates how the interveners represent those they have been deployed to engage as well as their own identity and role as such the book offers an enhanced understanding of the challenges related to civil military cooperation in international interventions as well as a theoretical contribution to the study of interventions more generally this book will be of much interest to students of international interventions military studies peacekeeping security studies and international relations
across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales however few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i.e. considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics the aim of the research topic the sociocultural context of psychosocial interventions was to address this lacuna as such we tried to help bringing a more contextual mindset to the implementation of health and wellbeing interventions this may help to shift the way such interventions are designed and implemented both at a granular local level i.e. influencing individual practitioners and at a large scale macro level e.g. influencing policy makers themes within this research topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels there has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests for us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences for the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically we therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out we hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation

The dollar rose by about 35 percent in real terms from 1995 through the end of 2001, supporting the booming US economy of the late 1990s but pushing the current account deficit to a record high of almost 5 percent of GDP. This special report provides alternative views of how large a dollar depreciation would be needed to restore a sustainable position. Jim O'Neill, Michael Rosenberg, and Catherine Mann analyzes the impact of currency misalignments on each of the three major economies: Martin Baily for the United States, William Cline for Japan, and Daniel Gros for Europe, and discusses the role of exchange market intervention in addressing the issues. Kathryn Dominguez, Edwin M. Truman, and Ernest Preeg.

A fascinating encyclopedic survey of the Spanish Cuban American War, the Philippine War, and the small wars between 1899 and the end of the occupation of Haiti in 1934. The name changes themselves are instructive: the usage of Spanish American War ignores the fact that the war in Cuba had been largely won by the Cuban revolutionaries before US intervention hence the new title Spanish Cuban American War. The use of Philippine Insurrection is replaced by Philippine War since the Philippine forces had taken much of the islands from Spain before US ground forces arrived and guerillas or revolutionaries have replaced bandits the term used by the US to discredit oppositional forces.
