On 25th February 2018, the Slovak investigative journalist Jan Kuciak and his fiancee Martina Kusnirova are found shot dead in their small house. They are 27 years old. The investigations which follow the double homicide lead to a story of power and its abuse, servility and sex, and a mafia-like network that committed murders and planned more. A system emerges which has been hollowed out and subverted by crime, privatised and instrumentalised by criminal groups whose tentacles reach far into the judiciary, the police, and to the very top of politics. Jan Kuciak and Martina Kusnirova had to die because they lived in a mafia state. More trees, hydrogen fuelled cabs, urbiology, a new model of taxation, solar panels on big box stores, the art of salvage, composters for dog poo in city parks, retrofitting our urban slabs, gardening the Gardiner ravine. What would make Toronto a greener place in the third volume of the Utopia series?

Dozens of imaginative Torontonians think big and small about sustainability from suggestions for changes to our transit system and more mixed use neighbourhoods to a tongue in cheek proposal for a painted line around the city and a short comic book about Toronto in the year 2057. Greentopia challenges the city and its residents to rethink what it means to be green in a metropolis and how to raise the level of these green oasis. Other pieces include an interview with Mayor David Miller and a breakdown of the ecological impact of our morning coffee. Greentopia features photos, maps, and a 56 page green directory of resources, organizations, incentives, and programs promoting sustainability in the GTA. Phil Edmonston, Canada’s automotive Dr. Phil, pulls no punches. He says there’s never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all new guide, he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring, and mind boggling depreciation. Many 2011-12 automobiles have chin to chest head restraints, blinding dash reflections, and dash gauges that can’t be seen in sunlight. Not to mention painful wind tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM’s 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save $2,000 by cutting freight fees and administrative charges. Diesel annual urea fill up scams can cost you $300 including an $80 handling charge for 25 worth of urea. Lemon Aid’s 2011-12 endangered species list includes the Chinese Volvo, the Indian Jaguar, and Land Rover. The Mercedes Benz Smart car, Mitsubishi, and Suzuki.

THE HANDBOOK FOR BUSINESS MANAGEMENT AND ADMINISTRATION 2024-03-29

In the late 1990s, the MP3 became the de facto standard for digital audio files, and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is rather, it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object-based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience: the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments.
