one of the best books on narcotics that has yet appeared medical review of reviews volume 22 january 1916 no one can be better fitted to place such a treatise before the public than mr towns who is in a measure responsible for the present legislative campaign against the wholesale distribution of habit forming drugs heretofore considered almost harmless by druggists and consumers which however insidiously undermine the health progress and prosperity of the individual and the community at large by whom a habit is formed from which the victim can not easily and perhaps never be released he justly claims that the physician is almost invariably to blame for the development of this drug using curse due to his ignorance of the length to which he can safely go in the administration of narcotics we should say that all points of importance i e causes warning against the danger help and hope for the afflicted treatment and cure of these unfortunates are covered herein mr towns faces a terrific problem and handles the subject manfully truthfully bravely yea and despite all that he knows of it hopefully as well no one especially interested in these subjects among the profession or laity should be without a copy medical times volume 43 january 1915 a solemn note of warning against the perils of the drug habit the rock the work is interesting and deserves to be read by members of the medical profession medical record the recent sensational legislation against the traffic in habit forming drugs has brought to light startling facts
about the prevalence of drug addiction among all classes of people not excluding doctors. Mr. Towns, whose life work is the study and treatment of the victims of these habits and who is largely responsible for the present legislative campaign here sums up his experience in regard to the prevalence of drugs and the methods of treatment and cure and he extends his discussion also to alcohol and tobacco. It is almost as important, he believes, that the public should be wary about sanatoriums and even about many doctors as about drugs themselves and he outlines a practicable mode of cure, the success of which he has himself repeatedly proved. The work is at once interesting and instructive and should be in the hands of every practitioner. Pacific Medical Journal Volume 58, January 1915. A few years ago he successfully treated some four thousand Chinese for opium. The Bellman Volume 19, August 21, 1915. Contents: I. The peril of the drug habit. II. The need of adequate specific treatment for the drug taker. III. The drug taker and the physician. IV. Psychology and drugs. V. Alcoholics. VI. Help for the hard drinker. VII. Classification of alcoholics. VIII. The injuriousness of tobacco. IX. Tobacco and the future of the race. X. The sanatorium. XI. Preventive measures for the drug evil. XII. recognizing that an addiction to 12 step programs can be just as dangerous as an addiction to alcohol or drugs this book provides techniques to counter the self defeating beliefs that lead to addiction it enables those who have gone through alcoholics anonymous narcotics anonymous and formal 12 step addiction treatments to overcome the self destructive beliefs and attitudes that these programs promote these include the idea that addicts and alcoholics are powerless the belief that addiction is an incurable disease the assertion that people who slip inevitably lose control and the notion that those who reject the 12 step approach are doomed devoted to helping individuals indoctrinated in 12 step dogma recognize their destructiveness this book provides effective psychological techniques to vanquish negative thinking and help individuals regain control of their lives
this book considers how largely accepted legal truths about drugs and addiction are made and sustained through practices of lawyering; lawyers play a vital and largely underappreciated role in constituting legal certainties about substances and addiction including links between alcohol and other drugs and phenomena such as family violence. Such practices exacerbate, sustain, and stabilise addicted realities with a range of implications, many of them seemingly unjust for people who use alcohol and other drugs. This book explores these issues drawing upon data collected for a major international study on alcohol and other drugs in the law including interviews with lawyers, magistrates, and judges, analyses of case law and legislation focussing on an array of legal practices including processes of law making, human rights deliberations, advocacy and negotiation strategies, and the sentencing of offenders. Buttressed by overarching analyses of the ethics and politics of such practices, the book looks at how alcohol and other drug addiction emerges and is concretised through the everyday work lawyers and decision makers do. Foregrounding practices, the book also shows that law is more fragile than we might assume. It concludes by presenting a blueprint for how lawyers can rethink their advocacy practices in light of this fragility and the opportunities it presents for remaking law and the subjects and objects shaped by it. This groundbreaking book will be of interest not only to those studying and working within the field of alcohol and drug addiction but also to lawyers and judges practising in this area and to scholars in a range of disciplines including law, science, and technology studies; sociology; gender studies; and cultural studies.
habitual drug use in the united states is at least as old as the nation itself habit forming traces the
history of unregulated drug use and dependency before 1914 when the harrison narcotic tax act
limited sales of opiates and cocaine under us law many americans used opiates and other drugs
medically and became addicted some tried hasheesh candy injected morphine or visited opium dens
but neither use nor addiction was linked to crime due to the dearth of restrictive laws after the civil
war american presses published extensively about domestic addiction later in the nineteenth century
many used cocaine and heroin as medicine as addiction became a major public health issue
commentators typically sympathized with white middle class drug users while criticizing such use by
poor or working class people and people of color when habituation was associated with middle class
morphine users few advocated for restricted drug access by the 1910s as use was increasingly
associated with poor young men support for regulations increased in outlawing users access to
habit forming drugs at the national level a public health problem became a larger legal and social
problem one with an enduring influence on american drug laws and their enforcement
