computational biology bioinformatics held in toledo in june 2018 daily life and living conditions in the byzantine world are relatively underexplored subjects often neglected in comparison with more visible aspects of byzantine culture such as works of art the book is among the few publications on greek byzantine populations and helps pioneer a new approach to the subject opening a window on health status and dietary patterns through the lens of bioarchaeological research drawing on a diversity of disciplines biology chemistry archaeology and history the author focuses on the complex interaction between physiology culture and the environment in byzantine populations from crete in the 7th to 12th centuries the systematic analysis and interpretation of the mortality profiles the observed pathological conditions and of the chemical data all set in the cultural context of the era brings new evidence to bear on the reconstruction of living conditions in byzantine crete individual chapters look at the demographic profiles and mortality patterns of adult and non adult populations and study dietary habits and breastfeeding and weaning patterns in addition this book provides an indispensable body of primary data for future research in these fields and so furthers an interdisciplinary approach in tracing the health of the past populations its a book to help students choose careers and courses after class 12th the neu med project is part of the horizon 2020 programme in the erc advanced project category it began in october 2015 and will be concluded in october 2020 the university of siena is the host institution of the project the project is focussed upon two tuscan riverine corridors leading from the gulf of follonica in the tyrrhenian sea to the colline metallifere it aims to document and analyze the form and timeframe of economic growth in this part of the mediterranean which took place between the 7th and the 12thc central to this is an understanding of the processes of change in human settlements in the natural and farming landscapes in relation to the exploitation of resources and in the implementation of differing political strategies this volume brings together the research presented at the first neumed workshop held in siena on 11 12 april 2017 the aim of the workshop was to draw up an initial survey of research and related work on the project one and a half years after its inception the project is composed of several research units each unit covers an aspect of the interdisciplinary research underpinning the neu med project each with their own methodology for this first volume of results it was decided not to give an account of all the work carried out within all the units but to select those lines of investigation which at the end of the first year and a half have made it possible to articulate and develop an interdisciplinary research strategy september 11 12 2017 paris france key topics
