Education and Development 2003

the development of education and educational system in the country has been a vexing problem for decades ever since the controversy generated in british days by the famous minute on education by lord macaulay the rapid growth of the economy in the post independence years and the rising expections of the people have led to a stalemate in education and educationists agree that much needs to be done to reorient the system to he needs of the times

A Review Catalogue of Development Education Materials for Schools 1983

this text approaches the subject of education and development on the basis that free universal primary education is a human right which should be accorded to all children forthwith this must be provided as a package of benefits encompassing universal primary education basic health care and adequate nutrition the analysis allows
for the fact that policies for education are also subject to the influence of broader social philosophies and epistemologies than those solely of the educational system

**Education and Development 1997-01-01**

Abstract piagetian psychology offers an approach to education from a child development orientation. Piaget's concepts concerning learning development and motivation may be especially useful to teachers of children of average ability who achieve below academic norms. The background and social science context of Jean Piaget's life and work is described. His conceptual framework for understanding the child in terms of stages of cognitive development is presented. From these developmental considerations, come principles of 3 modes of learning: operative, figurative, and connotative, as they apply to school curricula and the achievement of classroom skills. Motivational dynamics extending from the piagetian philosophy are examined. Classroom applications of this approach provide teachers with methods for assessing children's levels of cognitive development or analyzing curriculum materials. The active classroom discusses how teachers can implement piagetian insights in running school classrooms. Principles of classroom practice are derived from concepts of child growth and development.

**Child Development and Education 1976**

First published in 1984, this collection represents the combined contributions to an international conference held at the University of Bristol in April 1983. In assessing the complex relationship between education and development, it covers a wide range of countries in its appraisal and presents pictures both of optimism and pessimism. All, however, encourage the reader to re-examine long held beliefs and present a new starting point for fresh discussion of this vital subject.

**The Contents of Education 1987**

The role of education in enabling the sustainable development agenda explores the relationship between education and other key sectors of development in the context of the new global sustainable development goals (SDG). While it is widely understood that there is a positive relationship between education and other dimensions of development, populations around the world show a clear desire for more and better education. Education remains an under-financed and under-prioritised sector within development. When education does make it onto the agenda, investment is usually diverted towards increasing access to formal schooling without focusing on the intrinsic value of education as a tool for development. Within the international development community, more broadly, the authors explore these tensions through a review of literature from a range of disciplines, providing a clearer picture of the relationship between education and other development sectors. The book challenges silo thinking in the SDGs by exploring how achieving the SDG education targets can be expected to support or hinder progress towards other targets and vice versa. Drawing on examples from both low and high income countries, the book demonstrates how good education functions as an enabling right, impacting positively on many other areas. The book's scope ranges across education and development studies, economics, geography, sociology, and environmental studies and will be of interest to any researchers and students with an interest in education and the SDGs.
Education and Development 2010-11-26

this book considers the scope and dynamics of education for sustainable development esd and learning in schools in africa it explores the conditions and processes that support such learning and examines how esd in schooling can improve the quality and relevance of education the quality of education has been defined internationally as a key concern for educational institutions around the world including schools in africa the models of quality are often limited to performance based approaches and or inclusive approaches the contributions in this book show that there is more to a discussion on educational quality in africa than performance success and or inclusion the chapters explain how esd brings a new relevance to education in africa and at the same time sounds the beginning of a new concept of quality education the volume presents a collection of experiences in creating and supporting quality learning processes through a variety of esd practices

How to Do it: a Program Planning Guide for Development Education 1987

First published in 1983 the essays in this book are based on papers presented at a symposium held in March 1976 at the learning and development center Irde University of Pittsburgh it was planned to serve three purposes to pay tribute to retiring chairman Ralph W Tyler to mark the dedication of Irde’s new building and to provide an opportunity for those involved in research and development to reflect further on its implications for school change.

Early Childhood Development and Education 1975

This book provides important information regarding the millennium development goals adopted unanimously by the United Nations in 2000 setting explicit targets in terms of achieving progress in the developing world this volume provides both a theoretical overview of the role of education in development and also illustrates this with various case studies based on work of non-government organisations and other donors in the Asia Pacific region. the authors include a mix of development practitioners as well as academics engaged in research in this field. Thus the theory is illustrated and extrapolated by case studies focusing on community development interventions.

Education for Rural Development 2019-01-29

This is a very good and much needed book written by a very experienced researcher and teacher in the education leadership world it brings together a wealth of understanding and insights in the field of leadership and management development in education international journal of educational management. This book is an excellent survey of practice on a truly international scale which many will find valuable. Educational management administration and leadership few people could be better qualified to write about this topic than
Tony Bush: The book draws on a wealth of experience and detailed research typically it is extremely well structured written with great clarity and combines the highest levels of scholarship with an accessible style that will enable it to appeal to a wide audience this is a book that many in the field have been waiting for Professor Mark Brundrett Professor of Educational Research Liverpool John Moores University Liverpool this book is far and away the best international comparative study of leadership development for schools there are countless books highlighting the importance of leadership but none have satisfactorily gone to the heart of the issue especially for developed and developing countries and Tony Bush has done it here it is a sure guide to policymakers practitioners and researchers who want to make a difference Professor Brian J Caldwell Managing Director of Educational Transformations and former Dean of Education at the University of Melbourne Australia Leadership is critical to educational development and specific preparation is vital if leaders are to maximise their effectiveness in this major new text Tony Bush draws on his extensive international experience and research to examine the case for leadership development and assess the different modes of preparation used in Europe including the UK, North America, Asia Pacific, Australia, New Zealand, and Africa. He also examines research on how leadership impacts on school and student outcomes and considers future directions for leadership and management development in education. This text is essential reading for students of educational leadership and management as well as for policymakers, headteachers, and principals.

Enhancing Professional Development for Teachers 2007-10-04

This book is the product of twenty-five years of research and teaching in the field of curriculum development as well as extensive observation of and consultation with trainees teaches and classroom teachers on curriculum development problems. It attempts to provide help to education students who study curriculum development in colleges of education, polytechnics institutes, and faculties of education of universities. Its primary aim is to achieve a concise but scholarly account of the contexts and nature of curriculum planning and development and of the problems and issues relating to them. This account the author hopes will contribute to the continuing effort to improve the quality and efficiency of the curriculum planning and development. The author therefore feels that teachers, members of school boards, and educational researchers will find this book useful. The book is divided into thirteen chapters. Chapters one and two present curriculum planning and development in perspectives. They examine the meaning and purpose of education, definition of curriculum, views about curriculum, scope of curriculum, and history of curriculum development in Nigeria. Chapter three highlights the different patterns or types of curriculum organizations and their strengths and weaknesses. Chapter four to ten discuss the curriculum planning and development process. These chapters provide some guidelines on what to do on each of the various stages of curriculum planning and development. Chapter eleven examines curriculum innovation and change by highlighting the meaning of curriculum innovation and change and the need for curriculum innovation. Chapter twelve discusses some social contexts of curriculum development. Finally, chapter thirteen highlights the activities of some curriculum development bodies. The book is published by IISTE.org.

Learning to be 1972

Philosophy of development is a fascinating area of research at the intersection of philosophy, psychology, and education. This book is unique in that it combines a broad sketch of contemporary developmental theory with detailed discussions of its central issues in order to construct a general framework for understanding and analyzing theories of individual and collective development in various domains ranging from cognitive and moral development to developments in art. Special attention is also given to the rich relations between conceptual
