Report of the Secretary of the Senate from April 1, 2005 to September 30, 2005 bringing critical attention to a particular set of science fiction and fantasy films Larry and Andy Wachowski's The Matrix George Lucas Star Wars Saga and Joss Whedon's Avengers. This book utilizes a wide-ranging set of critical tools to illuminate their political ideologies while also examining any resistant and complicating turns or byways the films may provide. What they all have in common ideologically is that they or at least the genres they belong to tend to be regarded as belonging to politically conservative frames of sociocultural reference. With the Star Wars Saga, however, this idea is shown to be superficial and weak.

Index of Patents Issued from the United States Patent and Trademark Office 2014-06-04 George Lucas spoke about the didactic role of cinema and about his own work being presented through the moral megaphone of the film industry. A considerable body of scholarship on the six-part Star Wars series argues unconvincingly that the franchise promoted neo-conservatism in American culture from the late 1970s onward but there is much in Lucas's grand space opera to suggest something more ideologically complex going on. This book challenges the view of the saga as an unambiguously violent text exemplifying reactionary politics and discusses the films' identity politics with regard to race and gender.

The Politics of Big Fantasy 2016-03-04 covers receipts and expenditures of appropriations and other funds.

Identity Politics in George Lucas' Star Wars 1996 despite the success and significance of Jonathan Franzen's fiction his work has received relatively little scholarly attention. Aiming to fill this conspicuous gap, Jonathan Franzen and the Romance of Community analyzes each of Franzen's five novels in chronological order to reveal an interior logic animating his work integrating various formal and ideological perspectives to illuminate Franzen's work. Jesús Blanco Hidalga demonstrates that the concepts of salvation and redemption typical of romance narratives run throughout Franzen's fiction.
Even as he re-assesses and expands the familiar interpretations of Franzen’s work, Blanco Hidalga shows how these salvation narratives are used for self-legitimization not only by the characters but by the writer himself, combining critical rigor with interpretative boldness. Jonathan Franzen and the Romance of Community offers a new theoretical approach to a major contemporary author.

Learning explores the practice of musical aural training from historical pedagogical psychological musicological and cultural perspectives and uses these to draw implications for its pedagogy particularly within the context of higher music education. The multi perspective approach adopted by the author affords a broader and deeper understanding of this branch of music education and of how humans relate to music more generally. The book extracts and examines one by one different parameters that appear central to aural training proceeding in a gradual and well organised way while at the same time constantly highlighting the multiple interconnections and organic unity of the many different operations that take place when we interact with music through any music related activity. The resulting complex profile of the nature of our relationship with music combined with an exploration of non western cultural perspectives offer fresh insights on issues relating to musical aural training emerging implications are proposed in the form of broad pedagogical principles applicable in a variety of different music educational settings. Andrianopoulou propounds a holistic alternative to aural training which acknowledges the richness of our relationship to music and is rooted in absorbed aural experience. The book is a key contribution to the existing literature on aural education designed with researchers and educators in mind.
