Critical Theory and Contemporary Europe 2012-04-05 from the start of the european integration process one question has puzzled scholars what type of political association is the european union in absence of an agreed upon response most scholars have suggested that the european union is sui generis this book challenges the sui generis thesis by demonstrating that the eu is not a unique form of association but rather a federal union of states or what this book calls a federation this is a discrete form of political association on par with though differentiated from political modernity s two other main forms namely the state and the empire the federation cannot be understood on the basis of the general theory of the state or its concept of sovereignty the statist imaginary still dominates both the debates on federalism and the eu meaning that all federal policies are either seen as confederal associations of sovereign states or sovereign federal states this book challenges this binary by demonstrating that the federation is not a super state but a discrete political form with its own constitutional theory it is characterized by a double political existence a lack of internal hierarchy and the internal absence contestation or repression of sovereignty this book details the key aspects of federal constitutional theory and how this theory accounts for the eu s constitutional form as well as the crises it has faced in recent years this book is broken into five chapters that cover the introduction to federalism origins of the eu state transformation and teleology unity in diversity and emergency rule without a sovereign this book draws on a variety of literatures and historical material to help the reader develop a critical understanding of constitutional myths and the theory of federalism.

The Euro 2002 it is widely believed by historians of linguistics that the 19th century was largely devoted to historical and comparative studies with the main emphasis on the discovery of sound laws. Syntax is typically portrayed as a mere sideline of these studies while semantics is seldom even mentioned if it comes into view at all. It is usually assumed to have been confined to diachronic lexical semantics and the construction of some mostly ill conceived typologies of semantic change. This book aims to destroy some of these prejudices and to show that in Europe semantics was an important although controversial area at that time. Synchronic mechanisms of semantic change were discovered and increasing attention was paid to the context of the sentence to the speech situation and the users of the language from being a semantics of transformations a child of the biological geological paradigm of historical linguistics with its close links to etymology and lexicography the field matured into a semantics of comprehension and communication set within a general linguistics and closely related to the emerging fields of psychology and sociology.

Political Theory and the European Constitution 2004 despite growing scholarly interest in the EU's flagship policy towards its eastern and southern neighbours serious attempts at theory building on the European Neighbourhood Policy (ENP) have been largely absent from the academic debate. This book aims at contributing to fill this research gap in a three-fold manner. First and foremost it aims at theorizing the ENP as such explaining the origins, development, and effectiveness of this policy building on this effort it also pursues the broader objective of addressing certain shortcomings in EU external relations theory and even beyond in international relations theory. Finally it aspires to provide new insights for European policy makers. It is one of the first volumes to provide different theoretical perspectives on the ENP by revisiting and building bridges between mainstream and critical theories stimulating academic and policy debates and thus setting a novel less EU centric research agenda. This text will be of key interest to scholars, students, and practitioners in EU external relations, EU foreign policy, the European Neighbourhood policy, and more broadly in European Union Politics and International Relations.

Political Theory and the European Union 2003-09-02 essay from the year 2005 in the subject politics international politics topic european union london school of economics department of international relations language english abstract in spite of the growing empirical significance of the european union eu as a soft power scholars of international relations ir have found it difficult to identify a single theoretical framework to explain the making of european foreign policy efp the reasons for this apparent failure of rigorous theory building may be twofold on the one hand there is still much debate about what the eu the ontological object of inquiry
actually is on the other hand many authors have taken a self critical attitude towards their own discipline emphasising that there is still a multiplicity of convictions as to how we can best theorise efp though detailed analyses of the specific pattern of the eu s external relations have indeed been marginalised for a long time it seems plausible to trace this lack of theoretical coherence back to the nature of efp itself it is often argued that the eu is a political system sui generis a complex structure that is neither a state nor a non state actor and neither a conventional international organization nor an international regime in a similar vein some observers assert that the eu might most suitably be characterised as a hybrid political sphere that does not easily lend itself to classical foreign policy analysis fpa in fact the major ir perspectives on eu foreign policy making neorealist neoliberal and constructivist appear to be largely incompatible in this respect within each framework certain claims are made which effectively rule out or downgrade the validity and reliability of key premises in rival approaches therefore the central question posed in this essay is which theory best explains the making of eu foreign policy and if there is no single theoretical paradigm might there be any potential for an ana
