checkpoints and a clear chapter study plan. Chapters in this Essentials version are condensed to accommodate a shorter format but preserve the integrity of the text's hallmarks. Examining the role of mass media and information technology in contemporary society. Society in Focus, eighth edition, emphasizes the increasing diversity and globalization of societies everywhere. It is designed to help students think clearly and critically about sociological issues, concepts, and methods. Questioning is at the heart of this approach, and as students read this book, they are encouraged to become part of the sociological enterprise rather than remain passive observers. Every element of the text is designed to challenge students to evaluate social issues and guided by the sociological imagination to clearly formulate their own positions by asking questions that demand sociological and creative thought. Students are reminded that their conclusions and decisions as well as their non-decisions and inaction may have important social consequences. New to this edition, new coauthor Mica Thompson, an experienced teacher of introduction to sociology, brings a fresh new perspective as well as a wide array of different life experiences to this edition of Society in Focus. An expanded critical analysis in chapter 1 introduces all forms of media and technology and every chapter examines an aspect of their powerful social influence. Chapters 9, 16, and 17 have been updated to include the most recent worldwide financial and economic developments to help explain globalization and cultural diversity. Expanded application of feminist theory in every chapter to help students recognize the importance of gender diversity and the contributions of that theoretical perspective. In sociology, updated and new boxes throughout encourage students to take a closer look at society and selected social issues.
John Bodley's Cultural Anthropology provides students with the anthropological tools to question and understand their own culture and the world. The sixth edition of this dynamic book has been updated and revised throughout with a shorter length and a more streamlined focus. Updates include material on China and Hindu South Asia combined into a single chapter, a new chapter assessing the imperial world and the breakdown of states, and new examples throughout. In this introduction to the basic concepts of cultural anthropology, Bodley challenges students to consider big questions about the nature of cultural systems, what is natural and what is cultural about humans, what it is like to be human under different cultural conditions, and how do socio-cultural systems of different cultural scales satisfy basic human needs? Are race, language, and environment determinants of culture? What are the human costs and benefits of socioeconomic growth? What have been the major turning points in human history? What role do individuals play in shaping culture? Employing a scale and power approach, the text examines a representative sampling of the world's major cultural areas and dominant civilizations, from Australian Aborigines, Amazonia, and East African pastoralists to Pacific Islanders, Mesopotamia, China, Hindu, India, the British Empire, and the United States. These cultures are shown in depth as adapting integrated systems and as part of regional, continental, and global systems. He concludes the text with a wide-ranging assessment of human problems in the contemporary commercial world, emphasizing inequality, poverty, environmental degradation, and sustainability.
