and organization of SCM is systematically presented on the basis of the SSPP framework, in particular the relationships among three industries: Daikin, Tobacco Japan, Tobacco chemicals and cosmetics Kao, and Casual Fashion Fast Retailing and Inditex. The strategy cases are included from such diverse industries as automobiles (Toyota and Nissan), personal computers (Fujitsu), office equipment (Ricoh), and more. A model of supply chain process change on structure is proposed, focusing on the role of an SCM steering department. Illustrative examples overcome performance trade-offs based on theories of organizational change, process change, and dynamic capabilities. The book presents a theoretical framework for SCM that will be relevant to such areas as operations management, logistics management, purchasing management, and organizational design. SCM is firmly positioned among management theories. The author specifically proposes a theoretical framework of supply chain management (SCM) utilizing this well-known framework of contingency theory in the areas of strategic management and organizational design. This book explains supply chain management (SCM) using the strategy structure process performance (SSPP) framework utilizing this well-known framework of contingency theory in the areas of strategic management and organizational design. SCM is firmly positioned among management theories. The author specifically proposes a theoretical foundation of SCM that will be relevant to such areas as operations management, logistics management, purchasing management, and marketing. Both the static and dynamic sides of SCM are reported on. The static side focuses on supply chain strategies divided into three patterns: efficiency-oriented, responsiveness-oriented, and the hybrid efficiency- and responsiveness-oriented pattern. Suitable internal and external supply chain structures and processes are proposed. On the dynamic side, the big issue is to overcome performance trade-offs based on theories of organizational change, process change, and dynamic capabilities. The book presents a model of supply chain process change on structure. The focus is on the role of an SCM steering department. Illustrative cases are included from diverse industries such as automobiles, Toyota, and Nissan, personal computers, Fujitsu, office equipment, Ricoh, air conditioning, Daikin, tobacco, Japan Tobacco, chemicals, and cosmetics. Kao and casual fashion, fast retailing, and Inditex. The strategy and organization of SCM is systematically presented on the basis of the SSPP framework. In particular, the relationships among three management elements—strategy, structure, and process—can be identified in an SCM context. From many of the cases contained in this volume, there emerges an understanding of how to analyze the success and failure factors of SCM using the SSPP framework. In addition, the reader sees not only the static side of SCM such as process operation but also its dynamic side such as process innovation and process improvement.
