HIV Prevention 2009-03-13

HIV aids continues to be the pandemic of our times and there has not been a comprehensive medically based aids prevention book published in the last 5 years. It is estimated that 36 to 45 million people including 2.3 million children already are infected worldwide and an additional 4.7 million more are infected each year. There are about 6,000 new infections daily and about 12 million AIDS orphans. People receiving AIDS treatments feel well and have no detectable viral load but still can infect others and even when a vaccine is found it will take many years before it can be administered across the developing world. Discusses all aspects of AIDS prevention from epidemiology, molecular immunology, and virology to the principles of broad-based public health prevention interventions. Special focus on the array of interventions that have been proven effective through rigorous study. Identifies new trends in HIV/AIDS epidemiology and their impact on creating and implementing prevention interventions. Incorporates virology, biology, infectious diseases, vaccinology, microbicides, and research methodologies into AIDS prevention.
No Time to Lose 2001-03-02

The United States has spent two productive decades implementing a variety of prevention programs while these efforts have slowed the rate of infection. Challenges remain, and the United States must refocus its efforts to contain the spread of HIV and AIDS in a way that would prevent as many new HIV infections as possible. No time to lose presents the Institute of Medicine's framework for a national prevention strategy.

Family and HIV/AIDS 2011-10-22

Three decades into the HIV pandemic, the goals remain clear: reduce the number of infections, improve the health outcomes of those who are infected, and eliminate disparities in care. One observation continues to gain credence: families are a powerful resource in preventing, adapting to, and coping with HIV. Recognizing their complex role as educators, mentors, and caregivers, Family and HIV/AIDS assembles a wealth of findings from successful prevention and intervention strategies and provides models for translating evidence into effective real world practice. Chapters spotlight the differing roles of mothers and fathers in prevention efforts, clarifying the need.
for family community collaborations and examine core issues of culture ethnicity gender and diagnosis e.g. minority families adolescents with psychological disorders throughout risk reduction and health promotion are shown as a viable public health strategy. A reference with considerable utility across the health mental health and related disciplines. Family and HIV AIDS will be a go-to resource for practitioners working with families, researchers studying at-risk populations, administrators seeking to create new or evaluate existing prevention and care programs, and policymakers involved in funding such programs.

**Men at Risk 2015-12-04**

Presents a unique approach to HIV prevention at the intersection of sociological and public health research. Although the first AIDS cases were attributed to men having sex with men, over 70% of HIV infections worldwide are now estimated to occur through sex between women and men. In Men at Risk, Shari L. Dworkin argues that the centrality of heterosexual relationship dynamics to the transmission of HIV means that both women and men need to be taken into account in gender-specific HIV/AIDS prevention interventions. She looks at the costs of masculinity that shape men's HIV risks, such as their initiation of sex and their increased status from sex with multiple
partners engaging with the common paradigm in HIV research that portrays only women and not heterosexual active men as being vulnerable to HIV. Dworkin examines the gaps in public health knowledge that result in substandard treatment for HIV transmission and infection among heterosexual men both domestically and globally. She examines a vast array of structural factors that shape men's HIV transmission risks and also focuses on a relatively new category of global health programs with men known as gender transformative that seeks to move men in the direction of gender equality in the name of improved health. Dworkin makes suggestions for the next generation of gender transformative health interventions by calling for masculinities based and structurally driven HIV prevention programming thoroughly researched and theoretically grounded. Men at Risk presents a unique approach to HIV prevention at the intersection of sociological and public health research.

The New Public Health and STD/HIV Prevention 2012-12-09

despite effective approaches to prevention, STD and HIV infection rates remain fairly constant. Targeting implementation and monitoring of interventions have posed widespread problems and the recent spate of cuts to prevention budgets has made these roadblocks even more challenging. It is clear that working in sexual health
requires both a deeper understanding of STI HIV epidemiology and an ongoing quest for up to date realistic prevention strategies. The New Public Health and STD HIV Prevention offers readers leading edge access to both focusing on social determinants of sexual health at risk populations critical factors in approaches to prevention and reviews of new research. This authoritative volume explores areas as varied as HPV prevention technology based interventions, migration as a factor in disease transmission, and competencies key to effective leadership in the field. Dispatches from the frontlines of theory research and practice in the US and abroad include personal risk public impact balancing individual rights and STD HIV prevention distribution of prevention resources and its impact on sexual health prevention measures in diverse populations of women towards a better approach to preventive interventions with men who have sex with men. Adolescent sexual health and STIs reducing disparities in sexual health lessons from the campaign to eliminate infectious syphilis. Public health professionals of all backgrounds interested in or working in improving sexual health will find the new public health and STD HIV prevention an indispensable guide to conceptualizing the problems and clarifying possible solutions.
Young People and HIV/AIDS 2002

young people and hiv aids opportunity in crisis

Children and HIV/AIDS 2017-11-30

In December 1982 the Centers for Disease Control received the first reports of cases of children with HIV/AIDS. Since that time, the child welfare system as well as other human service organizations have been coping with and responding to the crises of children and families living with HIV/AIDS, including the considerable number of children affected by AIDS through the illness of their parents, siblings, or other family members. This volume is intended as a resource for personnel within the child welfare field serving children and families whose lives are touched by HIV and AIDS. The contributors add insight to and fuel the discussion of the fight against AIDS. They provide tools to help better serve the children and adolescents that the current epidemic so tragically affects. Chapters and contributors include factors associated with parents' decision to disclose their HIV diagnosis to their children, by Lori S. Wiener, Haven B. Battles, and Nancy E. Heilman. Custody planning with HIV-affected families is discussed by Sally Mason. Correlates and...
distribution of hiv risk behaviors among homeless youths in new york city by michael c clatts w rees davis j l sotheran and aylin attillasoy and hiv prevention for youths in independent living programs by wendy f auslander vered slonim nevo diane elze and michael sherraden originally published as a special issue of child welfare this volume examines lessons learned from a variety of perspectives and settings and identifies a number of continuing challenges facing the field children and hiv aids is an invaluable compendium that should be read by social workers and health specialists and all those affected by the epidemic

Innovations in HIV Prevention Research and Practice through Community Engagement

Engagement 2014-07-14

hiv continues to be a profound challenge facing communities nationally and internationally until a vaccine or a cure is found prevention remains a most crucial line of defense however the successes made to reduce exposure and transmission have not benefited all communities equally hiv continues to affect vulnerable communities and hiv related health disparities are growing the work documented in innovations in hiv prevention research and practice through community engagement spotlights the effectiveness of community involvement to
reduce HIV infections in the United States, this timely resource introduces the concepts of community engagement partnership and community-based participatory research (CBPR). Contributors provide detailed examples of these concepts in which diverse research partners blend their unique insights and skills to arrive at an authentic understanding of phenomena and inform the translation of best practices and processes to enhance equity in HIV prevention and treatment. Equitable interactive collaboration is central to these efforts in which community members and representatives from organizations, the scientific and medical sectors, and other relevant agencies nurture long-term health improvement through sustained teamwork. Challenges and barriers to effective engagement are identified as are characteristics of successful partnerships. Included in the book are details of a multigenerational HIV prevention intervention in a rural southeastern community, the challenges and successes of developing, implementing, and evaluating an intervention for higher-risk predominantly heterosexual black men in college. The history of gay community involvement in HIV prevention and its contributions to the theory and current practice of engagement are discussed. Next steps in the integration of HIV-related policy change and research community engagement within American Indian communities are explored. Keys to sustaining a CBPR partnership to prevent HIV within ethnic sexual and gender minority communities are highlighted. Innovations in HIV prevention research and practice through community engagement offer researchers and practitioners in public health, community health, and medicine...
guidance on community engagement that is both inspiring and realistic community engagement and knowledge continue to be essential to prevent hiv infections this book is a compilation of the state of the science of engagement and delves deeper into the meaning and utilization of community based participatory research with implications that reach beyond the hiv epidemic to public health and medicine in general laura c leviton phd senior advisor for evaluation robert wood johnson foundation princeton nj

Transgender Health and HIV Prevention 2006-01-04

get the latest assessment of the health needs of the transgender population the impact of the hiv aids epidemic on the transgender community has been tragically ignored and as yet there is surprisingly little research data on the subject of health care and hiv prevention in this marginalized population transgender health and hiv prevention fills this void by providing a groundbreaking empirical assessment of the health needs of transgender persons in several areas around the united states respected experts discuss issues that hinder the effectiveness of hiv prevention programs including housing mental health and employment as well as the unique broader problems of social stigma discrimination and the lack of transgender knowledge and sensitivity on the part of
health providers and prevention workers even though recent studies show estimated HIV infection rates to be as much as 60 percent among specific transgender populations in the United States. The transgender community continues to receive inadequate healthcare support. Transgender health and HIV prevention tackles the problems inherent in the healthcare system by first assessing the needs of transgender persons. Then, offering specific practical recommendations for remedy. Top researchers in partnership with community members in San Francisco, Houston, Washington D.C., Chicago, Boston, Philadelphia, New England, San Juan, and Minneapolis-St. Paul bring empirical data together to assess what has to be done to effectively stem the HIV epidemic. This essential resource is extensively referenced with several tables to clarify data. Transgender health and HIV prevention explores in detail health and social services needs of African Americans, Latinas, and Asian Pacific Islanders. Sources for the high rates of HIV infection among male-to-female transgender persons. The prevalence of physical and sexual violence, substance abuse, and unemployment in the transgender community. Risk behaviors of male-to-female transgender persons. Health care providers’ ignorance, insensitivity, and discrimination with training strategies to increase patient access and effectiveness of care. How traditional notions about femininity affect risk behaviors. A comparison between transgender persons and other sexual minorities. Transgender health and HIV prevention is crucial one of a kind reading for educators, students, researchers, public health professionals, social workers, and policymakers.

**Working with Men for HIV Prevention and Care 2001**

engaging men as partners is a critical component in aids prevention and care as in many contexts men are the
decision makers in matters related to reproductive and sexual health as reflected in the theme of the world aids
campaign of 2000 men s roles and responsibilities in relation to the health of their female partners have a
significant bearing on the course of the epidemic the work of unaids in this field has three broad objectives motivating men and women to talk more openly about sex sexuality drug used and hiv aids encouraging men to take greater care of themselves their partners and families and promoting programs that respond to the needs of both men and women it is important that work with men and boys should not seek to replace work with women and girls but rather complement it parallel programs for men and boys are crucial in ensuring that men protect not only their own health but also the health of their families by working in partnership with men rather than apportioning blame it is hoped that men can finally begin to be seen as part of the solution rather than part of a problem twelve projects were selected because they demonstrated such a perspective and represented a diverse range of interventions with men it was believed that an analysis of their strategies and lessons learned would generate common ground on men s needs associated with hiv aids and their general health and would provide insights into effective approaches for working with men publisher s description

**Intimate Interventions in Global Health 2017-05-11**

this book considers the response to the hiv epidemic in sub saharan africa by examining family planning
programs and hiv prevention efforts

Handbook of HIV Prevention *2000-02-29*

this handbook provides a comprehensive overview of the theories methods and approaches for reducing hiv associated risk behaviors it represents the first single source of information about hiv prevention research in developed and developing countries it will be an important resource for students researchers and clinicians in the field

*Consolidated guidelines on HIV prevention, testing, treatment, service delivery and monitoring 2021-07-16*

these consolidated guidelines on hiv prevention testing treatment service delivery and monitoring bring together existing and new clinical and programmatic recommendations across different ages populations and settings bringing together all relevant who guidance on hiv produced since 2016 it serves as an update to the previous
edition of the consolidated guidelines on hiv these guidelines continue to be structured along the continuum of hiv care information on new combination prevention approaches hiv testing arv regimens and treatment monitoring are included there is a new chapter on advanced hiv disease that integrates updated guidance on the management of important hiv comorbidities including cryptococcal disease histoplasmosis and tuberculosis the chapter on general hiv care contains a new section on palliative care and pain management and up to date information on treatment of several neglected tropical diseases such as visceral leishmaniasis and buruli ulcer new recommendations for screening and treating of cervical pre cancer lesions in women living with hiv are also addressed in this chapter guidance on service delivery was expanded to help the implementation and strengthening the hiv care cascade importantly this guidance emphasizes the need for differentiated approaches to care for people who are established on art such as reduced frequency of clinic visits use of multi month drug dispensing and implementation of community art distribution the adoption of these efficiencies is essential to improve the quality of care of people receiving treatment and reduce the burden on health facilities particularly in resource limited settings
Preventing and Mitigating AIDS in Sub-Saharan Africa 1996-03-28

the AIDS epidemic in sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda with far-reaching implications. This book details the current state of the AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

Socialising the Biomedical Turn in HIV Prevention 2016-06-28

This book concerns HIV prevention. In it, the authors argue that until the world focuses its attention on the social issues carried and revealed by AIDS, it is unlikely that HIV transmission will be eradicated or even significantly reduced. The book argues that we are currently witnessing the remedicalisation or the continuing biomedicalisation of HIV prevention, which began in earnest after the development of successful HIV treatment and that this biomedical trajectory continues with the increasing push to use HIV treatments as prevention, undermining what
has been in many countries a successful prevention response this wide ranging study argues that hiv prevention involves enabling people and communities to discuss sex sexuality and drug use and informed by these discussion devising locally effective strategies for promoting safe sexual and drug injection practices

A Clinical Guide to Pediatric HIV 2017-02-11

this book examines the impact of pediatric hiv on children adolescents and their families beginning with an overview of pediatric hiv epidemiology it traces the medical psychological and social dimensions of hiv through the trajectory of childhood and youth it examines the latest research on a wide range of topics including treatment adherence cultural legal and ethical issues and hiv stigma and its reduction chapters offer expert recommendations for clinicians working with children with hiv as well as researchers studying pediatric hiv in addition the book also discusses daily concerns associated with pediatric hiv such as disease management coping access to services risk prevention and health promotion topics featured in this book include the impact of pediatric hiv on families psychosocial considerations for children and adolescents with hiv hiv prevention and intervention in the school setting hiv disclosure in pediatric populations how to design effective evidence based
HIV risk reduction programs for adolescents: A clinical guide to pediatric HIV is a must-have resource for researchers, clinicians, and graduate students in child and school psychology, social work, and public health, as well as pediatric medicine, nursing, epidemiology, anthropology, and other related disciplines.

**High Coverage Sites 2006**

The report investigates programs and sites in developing and transitional countries regarded by international authorities as high coverage sites, i.e., where more than 50% of injecting drug users had been reached by one or more HIV prevention programs. Each case study includes a description of the development of the program, features of the services provided, an estimation of coverage factors, and a discussion of ways to maintain and expand coverage.

**Structural Interventions for HIV Prevention 2018-10-26**

A comprehensive new reference work on structural approaches to preventing HIV. Structural interventions—changes to environment aimed at influencing health behaviors—are the most universal and cost-effective tool in preventing...
new incidences of HIV they are not easy to get right however structural interventions for HIV prevention offers an authoritative reference for both understanding these programs and instituting them to greatest effect whether through changes to policy environment social community norms or a combination of each this volume offers actionable and attainable blueprints to creating and evaluating programs in any setting or country it is an essential resource for researchers and practitioners in the continuing fights against HIV

**Community Collaborative Partnerships 2012-12-06**

find out how best to develop HIV prevention programs that work community collaborative partnerships the foundation for HIV prevention research efforts is a must read for anyone interested in developing prevention programs within high risk urban environments illustrative case studies quality research revealing personal stories and helpful tables and figures provide valuable insights on innovative ways to partner in the prevention of the spread of HIV in youths leading experts in the field offer practical strategies to dissolve the distrust individuals in a community hold for researchers not a part of that community fostering an effective collaboration to deal with problems the book also describes ways to go beyond the United States model to reveal how to replicate the
same dynamic relationships in international communities active participation with the community and families has been found to be vital for the success of hiv aids prevention efforts community collaborative partnerships the foundation for hiv prevention research efforts solves the common problem of forcing ineffective program models onto an unreceptive community program developers get the necessary tools to develop relationships and cultivate substantive input from those in the community to help ensure better program results the research here is up to date and the suggestions invaluable topics in community collaborative partnerships the foundation for hiv prevention research efforts include the role of parenting in mental health and hiv risk research findings about frequency of sexual intercourse among adolescents racial socialization and family role in hiv knowledge family influences on exposure to situations of sexual possibility preadolescent risk behavior influence on parental monitoring strategies for collaboration between community and academic hiv prevention researchers involving urban parents as collaborators in hiv prevention research motivators and barriers to participation of minority families in a prevention program transferring a university led hiv prevention program to the community trinidad and tobago hiv aids prevention using a family based program and much more community collaborative partnerships the foundation for hiv prevention research efforts is valuable reading for researchers program developers community based organizations public policy advocacy organizations community organizers educators
HIV 2014-01-14

learn why it’s time for a new era in mental health and prevention science. HIV issues with mental health and illness is a comprehensive examination of the co-morbidity that exists between HIV/AIDS and mental illness. Internationally recognized experts in the field analyze the latest research on why HIV sufferers are at risk of developing mental illness and how people who suffer from mental illness risk contracting HIV through sexual behavior and substance abuse. This unique book focuses on clinical and diagnostic issues, the organization of service delivery systems, and community-based interventions. HIV issues with mental health and illness presents vital contributions from physicians, sociologists, nurses, social workers, and psychologists working to develop a plan to reduce the number of persons affected by the epidemic and to improve the quality of life of those already HIV infected. Aimed at promoting a new era in mental health and prevention science, the book examines vital issues including the interplay between depression, HIV, and chronic fatigue. Condom use among adolescents with psychiatric disorders, predicting HIV risk, and how targeted intervention can address multiple health risks.
increase in emotional stress can affect African American women concerned about becoming HIV infected STI risk reduction strategies. How client gender can affect mental health care service delivery and the implementation of intervention programs as part of supported housing programs. HIV issues with mental health and illness examines bridging the gap between research and practice. Depression and HIV, schizophrenia and HIV, mental health policy, and infectious diseases. HIV prevention community-based participatory research. Community psychology mental health disparities, translation research, transforming public health systems. HIV issues with mental health and illness is an invaluable resource for public health workers and policymakers. Psychologists, psychiatrists, social work nurses, infectious disease physicians, and addictions disease counselors.

**HIV/AIDS and Information 2003-09-02**

According to recent statistics from the World Health Organization, there are currently 36 million people living with AIDS. HIV worldwide, the disease is having truly devastating effects in many countries. With this in view, FID has brought together this important collection of papers with contributions by health workers, HIV/AIDS activists, sociologists, policy analysts, and journalists from around the world.
critical health communication scholars point out that the acceptance of hiv risk prevention methods are bound inside inequitable structures of power and knowledge nicola bulled’s in depth ethnographic account of how these messages are selected transmitted and reacted to by young adults in the aids torn population of lesotho in southern africa provides a crucial example of the importance of a culture centered approach to health communication she shows the clash between traditional western perceptions of how increased knowledge will
increase compliance with western ideas of prevention and mixed messages offered by local religious educational and media institutions bullied also demonstrates how structural and geographical forces prevent the delivery and acceptance of health messages and how local communities shape their own knowledge of health disease and illness this volume will be of interest to medical anthropologists and sociologists to those in health communication and to researchers working on issues related to hiv

HIV Treatments as Prevention (TasP) 2012-09-14

HIV treatment as prevention primer for behavior based implementation provides the first practical guide to integrating behavioral prevention with antiretroviral therapies for people living with HIV infection. This brief book discusses the historical and social context embedding the shifting landscape in HIV prevention where the use of effective treatments have become the focus of HIV prevention. While using treatments for prevention is promising, the history of HIV prevention offers several important pitfalls that must be avoided if HIV treatments are to ultimately succeed in preventing new HIV infections. Lessons learned from the successes and failures of other biomedical technologies used in HIV prevention, specifically syringes, condoms, and HIV testing, are critical to the success of using HIV treatments for prevention. HIV treatment as prevention primer for behavior based implementation summarizes the scientific evidence for advancing the use of antiretroviral therapies for HIV prevention. The evidence makes clear that HIV treatments can prevent HIV transmission but will fail if behavioral aspects of treatment and HIV transmission are ignored. Of greatest concern are medication adherence and risks for contracting other sexually transmitted infections. Placing HIV treatment within the context of behavioral interventions for maintaining medication adherence and reducing sexual risk behaviors is therefore essential to
the future of hiv prevention hiv treatment as prevention primer for behavior based implementation highlights two pioneering behavioral interventions aimed at maximizing the effects of antiretroviral therapies for preventing hiv transmission one of the interventions developed by the author's research team is discussed in detail and the intervention manual is included as an appendix

Modernizing Sexuality 2016-06-28

moving beyond the boundaries of hiv scholarship modernizing sexuality shows how western idealizations of normative sexuality and the power of modernity intersect in u s hiv prevention policy in this book anne esacove gathers interview archival and ethnographic data from the united states and malawi to reveal failing u s prevention efforts as seen in the promotion of love matches and women's right to say no to sex modernization embedded within u s policy actually limits action against this widespread epidemic and even exacerbates hiv risk among women instead by illuminating the collective solutions and multiple paths of prevention used by malawians esacove's analysis expertly exposes these fundamental flaws and provides direction for potentially more effective strategies through this analysis modernizing sexuality not only reveals major u s health policy
Interventions to Prevent HIV Risk Behaviors 1997

Biomedical advances in HIV prevention social and behavioral perspectives Lisa A Eatton and Seth C Kalichman editors. Three decades into the epidemic, a great deal is known about HIV and its transmission. More people are living with the disease, and the virus is no longer seen as a death sentence, but new people continue to be infected with HIV each year, making prevention strategies that are medically effective and behaviorally engaging as urgent a priority as ever. Biomedical advances in HIV prevention social and behavioral perspectives assembles the latest improvements, barriers to implementation, and possibilities for and challenges to future progress. Innovations such as pre-exposure prophylaxis, antiretroviral regimens for the high-risk uninfected and treatment as prevention, early use of ART to reduce infectiousness of new patients are examined, as are current findings on ongoing prevention and treatment concerns. Contributors illuminate the complex realities entailing adherence.
pointing out technological behavioral and cultural roadblocks as well as opportunities to significantly reduce infection rates. Detailed up to the minute coverage includes prevention services for persons living with HIV, adherence to HIV treatment as prevention and pre-exposure prophylaxis advocating for rectal microbicides and safe lubricants. Mental health and substance use are discussed in the context of scale-up of HIV prevention risk compensation in response to HIV prevention. Implementing biomedical HIV prevention advances.

Reports from South Africa, Uganda, Australia, Thailand, United States, Ecuador, and Peru. Researchers, practitioners, and policymakers working in the fields of HIV, AIDS, and public health will look toward biomedical advances in HIV prevention. Social and behavioral perspectives as both a means for developing and assessing current programs and a blueprint for the next generation of prevention efforts.

**Biomedical Advances in HIV Prevention 2013-10-08**

Delivering effective services to this growing population, this volume presents the first collection of reports on the impact of HIV/AIDS on the transgender community worldwide. It includes a thorough description of the unique HIV risks of transgender people and exposes their largely neglected health and social service needs. This unique book...
also reports on the first generation of prevention interventions targeting this community discusses guidelines for providing sex reassignment services to HIV-positive transsexuals and encourages collaboration between communities at risk researchers and people in the helping professions. The social stigma faced by this population adds to their risk of HIV infection. Low self-esteem, rejection, neglect, employment discrimination, disenfranchisement, and a desire for acceptance and validation are all contributing factors. Yet, as the editors point out, on the positive side, the transgender community has been able to mobilize and empower itself and has found a voice that no longer can be ignored. We call on transgender and nontransgender people alike to work together to advance HIV prevention and promote our sexual health in transgender and HIV. You'll encounter extensive discussions of the health, social service, and HIV prevention needs of the transgender community, tips on how to work with marginalized communities in an empowering way, explorations of the sexuality of both male-to-female and female-to-male transsexuals, first-ever findings on sex reassignment surgery on HIV-positive individuals, guidelines for surgery on HIV-positive transsexuals, transgender and HIV provides much needed and often requested information on HIV prevalence, risks, prevention, and care for this increasingly visible community.
Transgender and HIV 2014-02-25

according to the centers for disease control and prevention young people aged 18 to 25 are at a significant risk for acquiring and transmitting hiv human immunodeficiency virus and other stis sexually transmitted infections. primary developmental processes that place college students particularly at risk include the experience of intimacy sexual desires and the centrality of the peer group during these routine developmental processes. college students experiment with unprotected sex multiple sex partners and alcohol and illicit drugs all of which are contributing risk factors for hiv sti infections. early diagnosis, treatment and prevention of hiv and other stis is germane to promoting the sexual health of college students and reducing high hiv sti infection rates among young people. this edited volume will provide innovative and cutting edge approaches to prevention for college students and will have a major impact on advancing the interdisciplinary fields of higher education and public health. it will explore core ideas such as hooking up culture, sexual violence, lgbt and students of color as well as hiv and sti prevention in community colleges, rural colleges, and minority serving institutions.
three decades into the hiv pandemic the goals remain clear reduce the number of infections improve the health outcomes of those who are infected and eliminate disparities in care and one observation continues to gain credence families are a powerful resource in preventing adapting to and coping with hiv recognizing their complex role as educators mentors and caregivers family and hiv aids assembles a wealth of findings from successful prevention and intervention strategies and provides models for translating evidence into effective real world practice chapters spotlight the differing roles of mothers and fathers in prevention efforts clarify the need for family community collaborations and examine core issues of culture ethnicity gender and diagnosis e g minority families adolescents with psychological disorders throughout risk reduction and health promotion are shown as a viable public health strategy a reference with considerable utility across the health mental health and related disciplines family and hiv aids will be a go to resource for practitioners working with families researchers studying at risk populations administrators seeking to create new or evaluate existing prevention and care programs and policymakers involved in funding such programs
Family and HIV/AIDS 2011-10-21

develop a positive working relationship between researchers and community groups focusing on hiv aids prevention and discover how to evaluate hiv aids programs an indispensable manual for everyone involved with hiv aids research prevention techniques and the needs of individuals with hiv aids hiv aids prevention current issues in community practice covers everything from the likelihood of condom usage by college women to the psychological effects on minority men infected with the hiv aids virus essential reading for psychologists research scientists who work with communities or who are involved in aids prevention programs and for care takers of people with hiv aids contemporary topics in hiv aids prevention covers the necessary collaborative steps needed to create a positive researcher community based organization cob partner that will benefit researchers and those affected by the disease in hiv aids prevention you will examine many different models designed to effectively foster a positive researcher cbo relationship while learning how to overcome problems you may encounter when researching a social issue or working with a researcher this book also explains how and why many hiv prevention programs have been poorly evaluated due to a lack of funds and social politics in addition you will discover how you can obtain and or perform a true evaluation of an hiv prevention program in hiv aids
Men at risk masculinity heterosexuality and hiv prevention biopolitics (2023) ; ipcsit.com

prevention you will explore many important issues and factors that help create successful programs including factors necessary for valid hiv aids prevention program evaluations assessments of coping strategies psychological variables and the physical well being of african american and latino men living with hiv aids steps for the collaborative process between researchers and community groups making a good match between community based organizations and researchers hiv aids prevention gives you pertinent information and guidelines for selecting a community based organization to work with and the steps to creating a successful relationship this book will give you the strategies and information you need in order to give pastoral support and prevention education to at risk individuals you will discover what is necessary for a true hiv aids prevention program evaluation

HIV/AIDS Prevention 2014-03-05

animated by the belief that public health programs in botswana or other parts of sub saharan africa would be more effective if those who designed and implemented them possessed a better understanding of existing ethno medical as well as religious beliefs and cultural practices parallel discourses provides a revised topology of
religious identity in Botswana and then shows why it is important to disaggregate or otherwise distinguish between diverse faith-based communities from traditional African religions and African independent churches to mainline Christian denominations and Muslim communities when designing or implementing faith-based HIV prevention programs. It also describes the identity politics at work within various faith communities as well as between the faith sector and public health officials. While it may be true that there have existed parallel if not competing discourses on HIV and AIDS in Botswana between the public health sector and the faith sector, or between traditional healers and allopathic physicians, each with their own paradigms of authority and evidence, these strands of discourse are as suggested throughout this book amenable to a dialogical rapprochement. Interweaving parallel discourses on HIV and AIDS is itself instrumental to the implementation of increasingly effective HIV prevention programs, enhanced HIV diagnostic capacities, and better care for PLHWA (people living with HIV and AIDS). Though these essays focus on the many obstacles to collaboration between faith communities and the public health sector in Botswana, they also suggest common ground for increasingly collaborative and effective faith-based HIV prevention interventions.
these guidelines will help health authorities governmental and non governmental agencies and community groups
who seek to develop a productive relationship between traditional and conventional health systems for hiv
prevention and care in sub saharan africa they cover planning design implementation evaluation and the scaling
up of initiatives with the aim of expanding access to and quality of health services the guidance is supported by
examples from successful collaborative projects with lessons that have been learnt

mother to child transmission of hiv 1 afflicts hundreds of thousands of children every year especially in parts of
the world such as sub saharan africa where hiv infection is prevalent and resources are limited this tragic reality
has spurred researchers to search for an effective safe and inexpensive treatment that could reduce the risk of
perinatal hiv transmission the hivnet 012 trial was designed to provide preliminary information on the comparative
safety and efficacy of two relatively simple and inexpensive short courses of oral antiretroviral treatment likely to be feasible in resource limited settings the resulting report identified some problems with procedures and documentation but concluded that these issues did not compromise the results of the study however these issues have led to public scrutiny and continued controversy review of the hivnet 012 perinatal hiv prevention study critically and objectively evaluates the study s design and conduct and assesses the impact of the initial procedural issues on the validity of the overall findings and conclusions of the trial

Collaborating with Traditional Healers for HIV Prevention and Care in Sub-Saharan Africa 2006

if resources for hiv prevention efforts were truly unlimited then this book would be entirely unnecessary in a world with limitless support for hiv prevention activities one would simply implement all effective or potentially effective programs without regard to expense we would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the united states and millions of lives worldwide unfortunately funding for hiv prevention programs is limited even though the amount of available funding may
seem quite large especially in the United States. It is still fixed and not sufficient to meet all needs for such programs. This was very well illustrated in the summer of 1997 when over 500 community-based organizations applied for a combined total of 18 million of HIV prevention funding from the U.S. Centers for Disease Control and Prevention (CDC). Less than one-fifth of these organizations received support via this funding mechanism. Hence, although 18 million may seem like a large amount of money at first blush, it is not enough to meet all of the prevention needs that could be addressed by these community-based organizations.

Review of the HIVNET 012 Perinatal HIV Prevention Study, 2005-08-05

How successful are HIV prevention programs? Which programs are most cost-effective? Which programs are worth expanding, and which should be abandoned altogether? This book addresses the quantitative evaluation of HIV prevention programs, assessing for the first time several different quantitative methods of evaluation. The authors of the book include behavioral scientists, biologists, economists, epidemiologists, health service researchers, operations researchers, policy makers, and statisticians. They present a wide variety of perspectives on the subject, including an overview of HIV prevention programs in developing countries.
analyses that address questions of cost effectiveness and resource allocation case studies such as Israel's ban on Ethiopian blood donors and descriptions of new methodologies and problems.

The education sector plays a key external role in preventing and reducing the stigma surrounding HIV/AIDS. It also plays an important internal role in providing access to care, treatment, and support for teachers and education staff. A group that in many countries represents more than 60 percent of the public sector workforce, the education sector can also have a critically important positive effect on the future. Even in the worst affected countries, most schoolchildren are not infected. For these children, there is a chance to live lives free from AIDS.
they can be educated on the knowledge and values that can protect them as they grow up the authors of accelerating the education sector response to hiv explore the experiences of education sectors across sub saharan africa as they scale up their responses to hiv aids within the accelerate initiative working group established in 2002 by the joint united nations programme on hiv aids unaids inter agency task team on education this book demonstrates that leadership by the ministries of education and commitment from key development partners are crucial for mobilizing activities and that full participation of all stakeholders is required for effective implementation this book summarizes the experiences of technical focal points from the 37 ministries of education in sub saharan africa which are represented on the sub regional networks for hiv and education these experiences prove that the education sector response can play a crucially important role in the multisectoral national responses to this epidemic
