the 9th international symposium on insect plant relationships sip 9 was once more following the tradition established in 1958 a forum for investigators in both basic and applied entomology interested in the important and fascinating field of interactions between plants and insects we were pleased and honoured to organise this symposium which took place june 24 30 1995 in gwatt on the shores of the lake of thun in switzerland 168 participants from 26 countries from all over the world actively took part in the symposium by contributing 12 key note lectures and a total of 141 oral presentations and posters the favourable response
and the lively interaction of the participants in all symposium activities is the clearest indication of the success of sip 9 the organisers appreciated the enthusiasm and the willingness to collaborate shown by all participants the following volume contains written contributions 72 of only half of all presentations this is due to the fact that we decided to produce not only an account of the proceedings but also to publish all contributions as a special volume of the journal entomologia experimentalis et applicata this procedure was last adopted in 1978 for sip 4 organised by reginald f chapman and elizabeth a bernays and ensures a wide distribution of the papers within the scientific community and easy access through libraries inevitably we had to employ the same review procedure as applicable for the manuscripts regularly submitted to entomologia

the nature of contemporary organisation development od is often written about by both scholars and practitioners yet there is little evidence of these descriptions or debates on key issues having been based on reliably collected data this book compares academic and practitioner perspectives on the profession of od in the uk and how it has evolved over four decades the research which informs this book was designed to investigate similarities and differences in the perspectives between these two communities where practitioners and academics views varied in the data reasons for this are explored in this book through the theory lens of institutionalism fashions fads and the dissemination of management ideas the empirical data in how od has evolved in the uk in the underpinning research to this text was gathered through content analysis of job advertisements from over a four decade period this provided information on changes in the magnitude in the take up of the profession in the uk as well as significant developments in the content of the job roles over the period it will not come as a surprise to find that american thinking dominates in od as it does in many other domains of management what is a surprise is the extent to which od practice in the uk is so very different from what the academics tell us it is this book also identifies the extent to which institutional theory is at play in the development of professions with agency is a driver in shaping professions this manifests itself in terms of the perceived interests of what will give leverage for success in practitioner and
academic careers the nature of contemporary organization development is key reading for researchers scholars an practitioners alike of organizational change and development organizational studies management philosophy and related disciplines
