This factory written Detroit Iron shop manual is perfect for the restorer or anyone working on one of these vehicles. The CUCV or Commercial Utility Cargo Vehicle is a US military vehicle based on readily available commercial trucks originally intended to augment the purpose built but expensive Gama Goat 6x6 and older jeeps. The first generation was based on Dodge Chrysler trucks. This book is focused on the M1008 series second generation CUCV which was General Motor's first major light truck military vehicle production since World War II. They began production in 1984 and ended production in 1996 with most units being produced as 1984 model year units. Later production was focused on replacements for existing CUCVs. The majority of units were built from existing heavy duty light truck commercial parts. The M1009 was an upgraded up rated Chevy K5 Blazer with a 3.4 ton capacity. The M1008 series trucks were a 1 1/4 ton or 5 4 ton rated truck. In all 70,000 units were produced with three power trains. This manual is the repair parts and special tool list for these vehicles. It is published as a convenience to enthusiasts who may wish to have a quality professionally printed copy of the manual. This publisher has also printed other manuals for this series of vehicles. Military vehicle parts and assemblies are subject to battlefield damage.

often dangerous rigors of military training while enduring the jarring readjustment that occurred each time he returned to civilian life. Williams had no idea that even the newest reservists could find themselves on the frontlines of a battlefield in a matter of weeks. On August 2, 1990, the day that he graduated from the Combined Arms School, Saddam Hussein’s forces invaded Kuwait, and Williams’ life would change forever.

Spare parts tells the story of Williams’ harrowing deployment to the Persian Gulf, where he would be thrust into battle only 38 days after being called up. Enduring both the condescension of full-time marines and the danger of his limited training, he managed to form a core group that struggled to gain respect from a military machine that viewed them as mere spare parts. In gripping detail, Williams brings to life the physical and emotional trials he would face on the killing fields of Kuwait, where some of the woefully underprepared marines are able to rise to the challenge and others are broken by the horrors of battle. A powerful portrait of one man’s experience in battle and of the reservists who stand ready to leave civilian life to defend our nation at a moment’s notice, Spare Parts adds a moving new perspective to the literature of war.
