if you're considering the vastly improved 2007 version of SharePoint this concise practical and friendly guide will teach you how to get the most from the latest version of Microsoft's information sharing and collaboration platform. Essential SharePoint 2007 demonstrates how your business can use SharePoint to control documents, structure workflow, and share information over the Internet using standard tools. Business users already know Microsoft Office and Internet Explorer. Written in a conversational tone by internationally recognized SharePoint consultant and trainer Jeff Webb this book helps SharePoint administrators, site owners, and power users quickly gain the skills necessary to perform a wide variety of tasks for intranet and extranet websites and explains what's new in SharePoint 2007 for experienced SharePoint 2003 administrators. Essential SharePoint 2007 teaches you how to use SharePoint 2007 with Outlook, Word, and Excel and as a document management tool replacing for example shared network drives with libraries. Build and customize sites, lists, libraries, and web parts for intranets and extranets. Use SharePoint 2007 for team communication through blogs, wikis, surveys, and RSS and email alerts. Build a SharePoint workflow application create and program web parts in order to deliver custom services and data to a site. Deploy and administer SharePoint 2007. Each chapter ends with a summary of best practices advocated by the author and the first few chapters of the book are ideal as training materials for end users. Later chapters give developers and administrators tools not only to keep company sites running smoothly but also to customize and extend them. The book also contains several appendices with a glossary of terms and hard to find information. Essential SharePoint 2007 is a one stop task oriented guide for learning what's necessary to make this tool a vital part of team productivity.
the advances in wireless communication technologies and the proliferation of mobile devices have enabled the realization of intelligent
environments for people to communicate with each other interact with information processing devices and receive a wide range of mobile wireless
services through various types of networks and systems everywhere anytime this internet of things will dramatically modify our lives allowing
progress in various domains such as health security and its intelligent transportation systems a key enabler of this pervasive and ubiquitous
