Rock, Roger Blackwell, and Tina Stephan, co-authors of best-selling customer rules and from mind to market, take readers behind the curtain to uncover how businesses can create brands that are adopted by culture and capture a long-term position in the marketplace. They also discuss the nature of this research field as it is currently being developed and the trends in quantum chemistry, chemical and biophysical systems research. The book is divided into sections on theory, method, and context, and cultural phases and topics which together provide both methodological and areal coverage of the subject. The text is complemented by many line drawings and photographs, a foreword by W.G. Dever, and essays by major scholars in the field that have been gathered to create the most up-to-date and complete book available on Levantine and Near Eastern archaeology.

the fifteenth jerusalem symposium reflected the high standards of the former international scientific meetings which convene once a year at the
israel academy of sciences and humanities in jerusalem to discuss a specific topic in the broad area of quantum chemistry and biochemistry the
The topic at this year's Jerusalem Symposium was intramolecular dynamics, a subject of central interest for theoreticians, chemists, and biologists during the last two decades. There has been remarkable progress in our understanding of time-dependent phenomena. The development and application of the modern techniques of quantum mechanics and statistical mechanics to excited state dynamics and to chemical and biological systems constitutes a fast-developing current research area. The main theme of the symposium was built around a conceptual framework for the elucidation of photophysical and photochemical phenomena in atoms, molecules, van der Waals complexes, and clusters. Condensed phases, polymers, and biological supermolecules. The interdisciplinary nature of this research field was deliberated by intensive and extensive interactions between scientists from different disciplines and between theory and experiment. This volume provides a record of the invited lectures at the symposium.
