diagnosis dilated eye exam treatment eyeglasses contact lenses surgery. What is astigmatism? Astigmatism is a common eye problem that can make your vision blurry or distorted. It happens when your cornea, the clear front layer of your eye, or lens, an inner part of your eye, has a different shape than normal.

astigmatism symptoms tests treatment cleveland clinic Oct 12 2023

An eye care specialist will diagnose astigmatism with an eye exam. They'll look at your eyes, including inside them. Your eye care specialist might use a few tests to diagnose astigmatism, including visual acuity test, a visual acuity test is a test that checks your vision.
Astigmatism is a common vision problem caused by an error in the shape of the cornea. Symptoms can differ depending on the individual.

Diagnosis:
Astigmatism is diagnosed by a manual keratometer, an instrument used to measure the curvature of the cornea. A keratometer is often used in a basic eye examination, and the diagnosis may also be made by using a corneal topographer.

Symptoms Causes Diagnosis and Treatment:

Symptoms:
Symptoms can include blurred vision, sensitivity to light, eye fatigue, or a feeling of discomfort.

Causes:
Astigmatism can be caused by an imperfection in the shape of your cornea, the surface layer of your eye, or an interior part of the eye that helps it to focus.

Diagnosis:
Diagnosis of astigmatism typically involves the use of a keratometer and can be confirmed with additional testing such as a corneal topographer.

Treatment:
Treatment options for astigmatism can include corrective lenses, contact lenses, or surgery.

Complications:
Complications of astigmatism can include reduced vision quality, eye strain, or headaches.

Outlook:
The outlook for individuals with astigmatism is generally good, with treatment options available to improve vision.

Research and Statistics:
Studies on astigmatism are ongoing to better understand its causes and develop new treatment options.

Bipoc Related Conditions:
Astigmatism can occur in people of all races and ethnicities, and there is no specific correlation to bipoc-related conditions.

Duration:
The duration of astigmatism can vary depending on the individual and the severity of the condition.

Forbes Health:
Astigmatism is caused by an imperfection in the shape of your cornea, the surface layer of your eye, or an interior part of the eye that helps it to focus.

Summary:
Astigmatism is a common vision problem that can be managed through various treatment options.
