*Environmental Land Use Planning and Management* 2004 sprawl is one of the ugliest words in the american political lexicon virtually no one wants america s rural landscapes farmland and natural areas to be lost to bland placeless malls freeways and subdivisions yet few of america s fast growing rural areas have effective rules to limit or contain sprawl oregon is one of the nation s most celebrated exceptions in the early 1970s oregon established the nation s first and only comprehensive statewide system of land use planning and largely succeeded in confining residential and commercial growth to urban areas while preserving the state s rural farmland forests and natural areas despite repeated political attacks the state s planning system remained essentially politically unscathed for three decades in the early and mid 2000s however the oregon public appeared disenchanted voting repeatedly in favor of statewide ballot initiatives that undermined the ability of the state to regulate growth one of america s most celebrated success stories in the war against sprawl appeared to crumble inspiring property rights activists in numerous other western states to launch copycat ballot
initiatives against land use regulation this is the first book to tell the story of oregon’s unique land use planning system from its rise in the early 1970s to its near death experience in the first decade of the 2000s using participant observation and extensive original interviews with key figures on both sides of the state’s land use wars past and present this book examines the question of how and why a planning system that was once the nation’s most visible and successful example of a comprehensive regulatory approach to preventing runaway sprawl nearly collapsed planning paradise is tough love for oregon planning while admiring much of what the state’s planning system has accomplished walker and hurley believe that scholars professionals activists and citizens engaged in the battle against sprawl would be well advised to think long and deeply about the lessons that the recent struggles of one of america’s most celebrated planning systems may hold for the future of land use planning in oregon and beyond

The Land Use Planning System 2004 much of the preparation of this book has been generously supported by the lincoln institute of land policy cambridge massachusetts it evolved from a colloquium held in october 1977 under the sponsorship of the lincoln institute the three day symposium entitled land policy making the value choices involved the preparation of major papers and formal discussions most of which appear here in considerably revised form along with additional pieces commissioned later the colloquium was an idea jointly conceived by myself and edward wood a colleague at the time in the tufts university program in urban social and environmental policy we were concerned about two major limitations in the literature and debates over land use on the one hand there was little explicit recognition of the latent values that motivated land use policy on the other there was no common forum where people from the different land use fields could discuss the issues and learn from one another a small group of about two dozen people was invited to the colloquium each member was a leading spokesman for a different perspective and area of expertise all participated formally in some fashion all the papers were written expressly for the colloquium with the exception of ann strong's which was a keynote address to the american society of planning officials earlier in the year none of the papers has been published elsewhere
