Tribals socio economic and cultural perspective (Download Only)

the social and economic systems of any country are influenced by a range of factors including income and education as such it is vital to examine how these factors are creating opportunities to improve both the economy and the lives of people within these countries socio economic development concepts methodologies tools and applications provides a critical look at the process of social and economic transformation based on environmental and cultural factors including income skills development employment and education highlighting a range of topics such as economics social change and e governance this multi volume book is designed for policymakers practitioners city development planners academicians government officials and graduate level students interested in emerging perspectives on socio economic development international development is a comprehensive inquiry into the field of socio economic development founded on an understanding that economic advancement involves transformation of society it explores successful developmental strategies but also tries to identify factors behind failed endeavours and the human costs associated with them the book evaluates the role played by influential agents of development such as the state and its institutions authoritarian leaders international organizations donor agencies non governmental organizations civil society activists and private business actors key features a multi disciplinary approach taking into account politics economics sociology cultural aspects and history of development examines a breadth of different theoretical approaches and their practical applications presents both mainstream and critical viewpoints addresses such complex issues as governability processes rights of the poor colonial legacy armed conflict environmental sustainability gender relations foreign aid urbanization rural development and international trade suggested further reading list at the end of each chapter this well balanced book will be a key text for students and practitioners working in the area of socio economic development and more broadly in development studies the politics of development and international political economy this book develops a socio economic paradigm of the future in the context of digital transformation the challenge of economic openness is considered through the globalization of the world economic system by the example of modern russia the tendency of archaization of socio economic relations is explored which is connected with the gradual disappearance of ineffective institutes and their replacement by new institutes attention is paid to the regional aspect of the digital economy perspectives of development of the ethno economy in the context of integration of regional economic systems are determined the problem of preserving social identity and supporting the uniqueness of competitive advantages of the region s economy in the conditions of digitization is actualized and its perspective solutions based on a region s globalization management are offered also the problem of national and regional food security is considered increased social significance of the agro industrial complex and the necessity for its de economization on the platform of the digital economy are substantiated a new concept of the market economy in the conditions of digitization and the fourth industrial revolution is developed economic power of technological progress and possibilities of managing and re directing this power are determined the authors substantiate the transition to the sixth technological mode and the related transformation processes in the economy also the authors dwell on the problem of the shadow economy and corruption and consider the perspectives of its overcoming based on the possibilities of digital technologies the idea of de regulation based on the possibilities of automatization and ai is opposed to the idea of increase of state regulation based on ubiquitous computing and digital monitoring of economic activities the perspectives of increasing the economy s transparency in the digital age are proved the alternatives to the current model of development of the digital economy are given and scenario analysis of consequences of observing these models based on the cognitive approach is performed new opportunities for development of the integration
processes in entrepreneurship in the conditions of the digital economy are shown in particular in the aspect of inter regional and transnational sectorial clustering clusters are considered as growth points of the russian economy and the new russian experience of formation and development of clusters in the sphere of higher education in the context of region’s economy is studied the authors determine the contribution of key technological events in the development of entrepreneurship through the example of modern russia they come to the conclusion that despite the unique possibilities digital technologies do not necessarily create additional value for entrepreneurship and their application could be ineffective due to additional capital expenditures in case of complexity of return of long term venture investments the needs of entrepreneurship for innovative infrastructural provision in the context of the digital economy are determined and barriers on the path of its creation and practical application due to necessity for applying new forms of business organization are shown specific features of state management of a region’s economy in the conditions of digital modernization are shown and the modern russian practice of e government as a response to the modern challenges is studied the authors outline new perspectives of development of public private partnership as an effective direction of industrial and cluster policy of a modern region first published in 1986 routledge is an imprint of taylor francis an informa company this book provides advanced theoretical and applied tools for the implementation of modern micro econometric techniques in evidence based program evaluation for the social sciences the author presents a comprehensive toolbox for designing rigorous and effective ex post program evaluation using the statistical software package stata for each method a statistical presentation is developed followed by a practical estimation of the treatment effects by using both real and simulated data readers will become familiar with evaluation techniques such as regression adjustment matching difference in differences instrumental variables regression discontinuity design and synthetic control method and are given practical guidelines for selecting and applying suitable methods for specific policy contexts the second revised and extended edition features two new chapters on some recent development of difference in differences specifically chapter 5 introduces advanced difference in differences methods when many times are available and treatment can be either time varying or fixed at a specific time chapter 6 introduces the synthetic control method a treatment effect estimation approach suitable when only one unit is treated both chapters present applications using the software stata captures significant transformations in the theory and practice of economic and social rights in constitutional and human rights law this book determines the specific features of socio economic transformations of various spheres of the national economy with a focus on the financial system it considers the development of industrial holdings in the electric energy sphere and also studies the influence of technology on fish farming in modern russia the global factors of using digital technologies at the municipal level during creation of green and smart cities are analyzed the perspectives of development of tourism in the digital economy from the positions of supply and demand and are determined the specifics of development of agricultural production in the age of digital transformations by the example of modern russia are outlined and smart agricultural platform which allows for multiple increase of the agro industrial complex’s efficiency is developed new possibilities and need in reformation of the international monetary system in the conditions of the fourth industrial revolution are determined the problems and perspectives of development of eurasian stock markets in the modern economic conditions under the influence of wide distribution of digital technologies are systematized specific features of the evolution of the forms of money from gold to crypto currencies are are distinguished specific features of benchmarking of depreciation of currencies inflation under the influence of globalization and regionalization of the international monetary system are determined the authors present a concept of the banking system of the future in the conditions of macro economic instability which stimulates financial crisis management of the national economy and determine the role of banks in aggregation and redistribution of monetary resources in economy in the context of digital
transformations also attention is paid to social consequences of digital
modernization of the financial system transformation of human s social life in
the age of innovative banking is shown effectiveness of online banking as a new
form of payments that is popular in the digital economy is analyzed the authors
formulate competencies that employees of banks of the future which will
function in the digital economy should have and study the perspectives of
digitization of the practice of tax administration based on technological
processing and analytics of big data by the example of experience of modern
russia as well as related transformation processes in the existing practice of
the tax system organization a concept of organization and management of the
national tax system in the conditions of robotization of production and
consumption is developed and the role of blockchain technologies in improve
ment of the modern russian tax system is determined the investment platform for the
modern digital economy is offered as a result the scientific paradigm of
formation of the digital financial system in the conditions of industry 4.0 is
formed taking a unique comparative approach to the respective development paths
of india brazil and south africa ibsa this book shows that people and
governments in all three countries are faced with similar challenges of
heightened insecurity caused by liberalization and structural adjustment the
ways in which governments as well as individuals and worker organisations in
ibsa have responded to these challenges are at the core of this book the book
explores the nature of insecurity in the global south the nature of the
responses to this insecurity on public and small scale collective as well as
individual level the potential of these responses to be more than neo liberal
mechanisms to govern and contain the poor and lessons to be learnt from these
countries the first section covers livelihood strategies in urban and
rural areas as individual and small scale collective response to the condition
of insecurity insecurity in the countries of the south is characterised by a
high degree of uncertainty of the availability of income opportunities the
second section looks at state responses to insecurity and contributions on
social protection measures taken by the respective ibsa governments the third
section discusses whether alternative development paths can be identified the
aim is to move beyond denunciatory analysis livelihood strategies as well as
public policies in some of the cases allow for the building of new spaces for
agency and contestation of a neo liberal mainstream which provide emerging and
experimental examples the book develops new thinking on northern welfare states
and their declining trade unions it argues that these concepts knowledge and
policy innovations are now travelling in three directions from north to south
from south to north and between southern countries this book provides unique
insights for researchers and postgraduate students in development studies
social policy and industrial sociology truths and half truths is aimed at
economic and social science academics and students who are interested in the
dynamics of china s institutional development and societal transformation
covering the complexity of the social economic and governance reforms behind
the economic miracles achieved by china since its reform in 1978 and
particularly in the past twenty years this book provides much needed insight
and critical thinking on major aspects of china s reform topics include
employment environment anti poverty urbanization and rural development
education corruption political regime and media readers will be able to re
evaluate the costs and benefits of china s modernization from a point of view
of sustainability written by highly knowledgeable and well respected academics
in law and economics with decades of experience in china studies provides an
insight from academic points of view written in a reader friendly journalistic
style an integrated monograph each chapter addresses a particular area of
reform and can be read independently economic integration is one of the most
noteworthy issues in international economic policy at the end of the twentieth
century the recent examples of the european union eu and the north american
free trade association nafta have raised important questions about the economic
integration process and the possible establishment of economic unions in other
parts of the world against the backdrop of the financial crisis in europe and
prospects of increasing integration in asia this volume showcases research from
an international array of researchers to provide a basic understanding of the
tribals socio economic and cultural perspective

current issues problems challenges and opportunities for achieving integration addressing both empirical and theoretical aspects of such topics as monetary union social policy reform and social union public finance and technology policy the chapters in part 1 are focused primarily on economic issues while part 2 covers on social policy the welfare state and political reforms with a particular emphasis on the european union among the questions addressed what are the main determinants and implications for socio economic integration how can economic policy influence the growth and integration process why is innovation important for regional economic development what has been the policy response so far and what lessons have we learned from it and finally what are our action lines for the future simon kordonsky divides the social structure of contemporary russia into distinct estates or social groups and describes each organization s unique resource based political and economic nature as he guides readers through russia s peculiar service and support estate system kordonsky reveals how remarkably effective inventing and institutionalizing threats can be in the distribution of scarce resources in a social system of this kind his book emphasizes the fundamental differences between resource based economies and traditional risk based economies and their role in russia s future this book presents most recent research studies on mapping and spatial analysis of socio economic and environmental indicators used by various national and international contributors to regional development projects it gathers the best contributions to the 1st international conference on mapping and spatial analysis of socio economic and environmental indicators for the local and regional sustainable development the conference was held in southern tunisia tataouine in march 2015 the research studies focused on generating and analyzing indicators in various domains of agriculture energy industry tourism transport urban planning exploitation of natural resources infrastructure health environment education information and communication technologies social affairs and employability and culture and sport socio economic and environmental indicators are important in regional development plans and strategies as they allow to observe and analyze changes in the economic growth and to measure their impact on the environment and on social networks daily life of citizens on the basis of well defined geomatic approaches and particularly through sophisticated digital mapping and spatio temporal analyses authors focused on retrieving indicators to evaluate the exploitation rate of natural resources intensity of the energy consumption in various economic sector net migratory flows quality checking of the air in urban areas adaptation to climate change and vulnerability of the coastal domain and risk of marine submersion due to sea level rise the book is of interest not only to investors and contributors to regional development projects but also to all relevant policy makers this book is designed to explore the following challenges and imperatives for african countries in the twenty first century liberalisation of commercial and industrial activities in a deliberate effort to make them the preserve of the private sector generation of an appropriate industrial and trade strategy nurturing technological development redressing the debt burden curbing industrial strife protection of the fragile natural environment and reconsideration of the size and functions of government trends in cleaner business decisions have resulted in sustainable business models involving society stakeholders and consumers sustainable choices of companies create competitive differentiations that enable consumers to weigh social values and shift loyalties in the competitive marketplace this book focuses on sustainability as the pivot of marketing and argues that commitment to sustainability in business not only equips companies to have greater social impact but also inspires an emotional response in consumers that aids companies in growing their image brands and socio political reputations exploring topics such as the circular economy sustainable logistics eco innovation conscious consumption and social entrepreneurship the chapters discuss sustainable practices in emerging markets and co creation between corporations and consumers this book offers researchers innovative concepts on sustainable business modelling this open access book provides a comprehensive analysis of the socioeconomic determinants of covid 19 from the end of 2019 until presently the world has been ravaged by the covid 19 pandemic although the cause of this
is obviously a virus the extent to which this virus spread and therefore the number of infections and deaths was largely determined by socio economic factors from this it follows that the course of the pandemic varies greatly from one country to another this observation applies both to countries resilience to such a pandemic which is mainly rooted in the period preceding the outbreak of the virus and to the way in which countries have reacted to the virus including the political choices on how to respond meanwhile research has made it clear that the nature of this response e g elimination policy mitigation policy and proceeding herd immunity was on the one hand strongly determined by political and ideological factors and on the other hand was highly influential in the factors of success or failure in combating the pandemic the book focuses on the situation in a number of western regions notably the usa the uk and the eu and its member states the author addresses the reasons why in many western countries both pandemic prevention and response policies to covid 19 have failed the book concludes with recommendations concerning the rearrangement of the socio economic order that could increase the resilience of western societies against such pandemics social regeneration is about the transformative processes that through institutional choices that embody cooperation and inclusion develop opportunities and capabilities for weak categories and transversally for society the challenge of social regeneration can be addressed in part through organisational solutions increasingly identified with social economy organisations since they are characterised by a social objective cooperation and inclusive democratic governance besides the organisational element social regeneration and local development provides a new perspective on interacting socio economic factors which can work in synergy with the social economy organisations model to promote and sustain social regeneration and well being such elements include civic engagement and social capital the nature of the welfare system the use of physical assets in urban and rural areas leadership technology and finance by analysing organisational and contextual elements this book offers an institutional perspective on how socio economic systems can reply to challenges such as social and environmental degradation financial crises immigration inequality and marginalisation much of guyana s 20th century history was defined by the pnc dictatorship and the political and economic wreckage it left behind in guyana s great economic downsing 1977 to 1990 dr ramesh gampat presents a comprehensive study of these specific years when the national economy contracted by 2.7 percent annually he explores the multiple facets of the country s political tribalism which does not value freedom liberty and the flourishing of all people it values only freedom liberty and flourishing of tribes the study reinforces the widely held belief that until and unless these adversarial groups subsume their respective selfish interests and commit to the common cause of national peace and development the great downsing might not rest as a historical event but could well re emerge with further economic devastation if the lessons go unheeded dr gampat makes a strong case for federalism as a solution to guyana s ethnic politics federalism he posits would ensure that all guyanese have equal access to opportunities and resources since a system of provincial governance would be better placed to address discriminatory policies and practices at a localised level with the country sitting on the cusp of transformative development to be propelled by new found oil wealth there is an urgency to settle the divisive politics if every guyanese is to benefit fairly and equitably from the economic boom guyana s great economic downsing 1977 to 1990 offers up a studied and comprehensive analysis that should be part of that bipartisan discourse going forward ryhaan shah novelist social activist a few piecemeal academic articles analyzing guyana s economic evolution over the period 1977 to 1990 were written but they are scattered and lost away in various journals what was missing is a comprehensive and rigorous exploration of the era of cooperative socialism dr ramesh gampat s book fills this gap it is a superb synthesis of historical theoretical and econometric exploration of the great downsing the book not only provides estimates of important macroeconomic concepts such as guyana s total factor productivity and long term growth but also produces the useful statistics and reviews of poverty inequality life expectancy education outcomes
as well as a detailed analysis of the rice sector as if these are not enough
gampat sets the tone by situating the exploration in the country s long
standing and debilitating ethno political dynamics this self contained book
will be of tremendous use to policy makers journalists and students interested
in the historical context of present day outcomes i highly recommend this book
to public libraries and home reference libraries tarron khemraj william and
marie selby professor of economics and international studies new college of
florida in this fascinating and challenging work the author analyses the way
water for drinking is produced distributed owned acquired and consumed in
contrasting ways in different settings from the taken for granted all purpose
as water flowing out of taps in advanced economies to extreme inequalities of
access to water of variable qualities drinking water tells its own interesting
story but also reflects some of the centrally important characteristics of the
state and economies of the different countries from sparkling mineral water in
germany to drinking water garages in taiwan from water tankers in mexico city
to street vendors in delhi markets comparisons are made to stretch our
understanding of what we mean by an economy quality and property rights of
water in addition the study of socio economics of drinking water provides a
route into understanding interactions between polity economy and nature one of
the major themes of the book is to analyse the sociogenic nature of
sustainability crises of economies of water in their environmental settings
epidemics droughts pollution land subsidences and floods overall it develops an
economic sociology neo polanyian approach in a comparative and historical
exploration of water for domestic consumption at home in the netherlands uses a
range of indicators to describe developments in the integration of non western
migrants and their children in the netherlands attention is focused on the
situation of non western children in education the position of non western
migrants on the labour and housing markets their representation in the crime
figures and their degree of socio cultural integration the book also looks at
civic integration the mutual perceptions of the non western and indigenous
populations and the life situation of young people with a non western
background waqf is one of the most potent socio economic tools for reducing
public sector deficit and breaking the chain of intergenerational poverty
providing a high level discussion on waqf development and innovation within the
context of modern socio economic and legal developments this book examines the
importance and potentials of waqf and the issues relating to its legal and
regulatory framework the research delivers future directions for countries that
plan to explore this socio economic institution readers and policymakers will
be able to replicate successful experiments and learn from some failed
initiatives to seek alternative funding platforms to support the fiscal
policies of developing countries the volume discusses the relevance and novel
application of waqf in the modern economic system and social development it
reviews applicable laws and regulations pertaining to waqf and trust laws and
examines critical cross country case studies and experiences setting an agenda
for further researchers in the field of waqf this comprehensive high level
analysis with case studies from leading jurisdictions across the world is a key
resource for researchers policymakers and institutions interested in charitable
endowments islamic finance and social finance the great financial crisis of
2008 and the ensuing global economic and financial turmoil have launched a
search for models for recovery the advocates of austerity present the baltic
states as countries that through discipline and sacrifice showed the way out of
crisis they have proposed the baltic model of radical public sector cuts wage
reductions labor market reforms and reductions in living standards for other
troubled eurozone countries to emulate yet the reality of the baltic austerity
fix has been neither fully accepted by its peoples nor is it fully a success
this book explains why and what are the real social and economic costs of the
baltic austerity model we examine each of the baltic states by connecting
national level studies within a european and global political economy thereby
delivering comparative breadth that supersedes localized understandings of the
problem thus for each of the three baltic states individual chapters explore the
different economic and social dimensions of neo liberal post communism and the
subsequent wider global economic and financial crisis in which these newly
financialized economies have found themselves especially vulnerable to the austerity model adopted by Baltic national governments in response to the crisis reveals the profound vulnerabilities created by their unwavering commitment to liberalized economies. Not least in terms of the significant exit of their labor forces and consequent population loss, this book looks beyond basic financial metrics to claim a success story for the Baltic austerity model to reveal the damaging economic and social consequences first of neo liberal policies adopted during transition and latterly of austerity measures based on internal devaluation. Combined these policies undermine the possibility of longer term recovery and even social and economic sustainability not to mention prospects for successful integration in the now faltering European project that has departed from its social model roots. This book focuses on how important massive information is and how sensitive outcomes are to information in this century. Humans now are coming up against the massive utilization of information in various contexts. The advent of super intelligence is drastically accelerating the evolution of the socio economic system. Our traditional analytic approach must therefore be radically reformed in order to adapt to an information sensitive framework which means giving up myopic purification and the elimination of all considerations of massive information. In this book authors who have shared and exchanged their ideas over the last 20 years offer thorough examinations of the theoretical ontological basis of complex economic interaction econophysics and agent based modeling during the last several decades. This book thus provides the indispensable philosophical scientific foundations for this new approach and then moves on to empirical epistemological studies concerning changes in sentiments and other movements in financial markets. Resilience is a value that unfolds over a lifetime and has shown to be expressed in different ways and by different disciplines. This book covers a total review and reflections of resilience role in creating better socio economy. The author targets to provide practitioners, researchers and change community leaders a roadmap to boost resilience economy and resilience engineering and manage their existence. This work is essential for better withstanding adverse shocks and reducing the economic costs associated with weak economic structures through ability to absorb disturbances and bouncing back while continuing to function with resilient economy. The world would witness more harmony while enhancing its capacity to respond to sudden crisis something that is worth exploring more in today's daunting conditions. This book provides the latest empirical data on the three forms of resilience: informality, solidarities, and unpaid care work. It uncovers and quantifies these three forms of resilience that are generally invisible or ill recognized whereas these play a major role in the livelihoods of poor and vulnerable populations. The book shows how the slow but constant unveiling of these forms over the past four decades has gradually changed our vision of progress and development and is impacting the norms and concepts that shape our vision of the economy and society. The book also emphasizes the role of informal economy through explaining the origins of the concept, its definitions, and the methods of data collection and measurement. As such, the book will be of interest to students, researchers, and policy makers in population studies, economics, and international development showcasing fuzzy set theory. This book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and the contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective. Thus far, fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement. These chapters examine the latest work in this area while also exploring further applications including social exclusion, the labour market, educational mismatch, sustainability, quality of life, and violence against women. The authors demonstrate that real world situations are often characterised by imprecision, uncertainty, and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic. By contrast, fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena. This book will be of significant interest to economists, statisticians, and sociologists.
utilising quantitative methods to explore socio economic phenomena this open access book examines how childhood social disadvantage influences young adult demographic decision making and later life economic and well being outcomes this book in particular focuses on testing whether the consequences of childhood social disadvantage for adult outcomes differ across societies and whether these differences are shaped by the context of opportunities that societies offer to diminish the adverse impact of economic and social deprivation the book integrates a longitudinal approach and provides new insights in how the experience of childhood disadvantage e.g. low parental socio economic status family disruption influences demographic decisions in adulthood e.g. the timing of family events such as cohabitation marriage or parenthood the risk of divorce or having a child outside a partner relationship the exposure to later life loneliness poor health and economic adversity moreover using a cross national comparative perspective it investigates whether the relationships of interest differ across nations and tests the context of opportunities hypothesis arguing that the links between childhood disadvantage and adult outcomes are weakened in societal contexts offering good opportunities for people to escape situations of deprivation to do so the book analyzes national contexts based on economic prosperity family values and norms and welfare state arrangements showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour the contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement these chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women the authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic by contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena this book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena preface the world is now ready to enter a second wave of coronavirus and several lockdowns what a year ago seemed too far and like a fairytale is now a reality and a nightmare all over the world on march 11 2020 the world health organization who declared the coronavirus disease a.k.a. covid-19 a pandemic as it spread in a short time all over the world the coronavirus disease has already affected life in many countries in the long term it is predicted that it will bring about changes that are quite likely to be permanent along with the measures taken on prevention and control of the spread of the outbreak international supply chains supply demand balance consumer and producer behavior business methods working models education methods and daily life are changing the concern for all countries needs to be researched in different aspects the covid-19 crisis has caused considerable damage in every aspect of life we believe that different socio economic aspects need to be discussed by scholars involved in academia and people who are interested in contributing to this new topic the world is facing this book comprises nine chapters including topics related to several impacts and challenges that covid-19 brought about on economy education social life trade geopolitical relations and what is more important on our health care systems we realize that this editorial book will lead a way to policy makers implementers researchers students and those who are interested in learning more about covid-19 impacts all over the world we hope and believe that it will be widely read as socrates said the secret of change is to focus all of your energy not on fighting the old but on building the new now it's our turn to focus on our new normal new reality and we are all in this together the second edition of a bestseller quantitative methods and socio economic applications in gis previously titled quantitative methods and applications in gis details applications of quantitative methods in social science planning and public policy with a focus on spatial perspectives the book integrates gis and
quantitative computational methods and demonstrates them in various policy relevant socio economic applications with step by step instructions and datasets the book demonstrates the diversity of issues where gis can be used to enhance the studies related to socio economic issues and public policy see what s new in the second edition all project instructions are in arcgis 10 2 using geodatabase datasets new chapters on regionalization methods and monte carlo simulation popular tasks automated as a convenient toolkit huff model 2sfca accessibility measure regionalization garin lowry model and monte carlo based spatial simulation advanced tasks now implemented in user friendly programs or arcgis centrality indices wasteful commuting measure p median problem and traffic simulation each chapter has one subject theme and introduces the method or a group of related methods most relevant to the theme while each method is illustrated in a special case of application it can also be used to analyze different issues for example spatial regression is used to examine the relationship between job access and homicide patterns systems of linear equations are analyzed to predict urban land use patterns linear programming is introduced to solve the problem of wasteful commuting and allocate healthcare facilities and monte carlo technique is illustrated in simulating urban traffic the book illustrates the range of computational methods and covers common tasks and major issues encountered in a spatial environment it provides a platform for learning technical skills and quantitative methods in the context of addressing real world problems giving you instant access to the tools to resolve major socio economic issues this book analyzes the impact of migration on the lives of multiple generations of 2000 turkish families exploring education marriage fertility friends attitudes and religiosity it reveals transformations and continuities in the lives of migrants and their families in europe when compared to their non migrant counterparts in turkey this book is the first to be dedicated entirely to the european semester a new framework for policy coordination across european union eu member states the semester represents a major advancement in eu governance created in 2010 in the wake of the financial and sovereign debt crises and revamped in 2015 it was intended to provide a new socio economic governance architecture to coordinate national policies without transferring legal sovereignty to eu level the papers in this collection are written by authors who have already contributed to this literature and have conducted original research for their studies the book offers an empirical and theoretical assessment of the european semester examining its implications along three critical axes running respectively between the economic and the social the supranational and the intergovernmental and the technocratic and democratic poles of eu governance the book concludes that the european semester challenges established theoretical understandings of eu governance as it is a prime example of the complexity that supersedes simple polar oppositions the chapters were originally published in a special issue of the journal of european public policy introduction starting from the 1950s thailand had experienced unprecedented economic boom in the nation s history until the 1980s the average annual growth in the 1960s was 8 7 in the 1970s and 4 6 in the beginning of the 1980s 1 thai people especially those who are in the nation s capital bangkok enjoyed the economic boom and started to have modernized lifestyle however behind the scene of the national economic success rural villages were forced to face predicament because of the urbancentered industrial economy based on neo liberal economic beliefs in light of the historical context of the relationship between thai community and the high powered state authority examining one specific community which is struggling to find a way of development in the globalized world today will be of great help to understand the contemporary notion of rural development in thailand in this paper focus is centered on a village called mae kampong which has been under great influence of the royal project and the government in terms of development and yet has a great deal of potential for achieving a selfreliant way of community governance because of its traits as a traditional agrarian rural community this paper aims to examine the socio cultural changes that occurred in the village over the course of the contemporary development and ultimately the outlook of community self sufficiency and selfreliance deploying a realistic and empirical approach to look at the thailand s contemporary
phenomena happening in the rural communities mae kampong is the third village of seven villages in huai kaew sub district mae on district chiang mai province northern thailand known as a major producer of northern thai traditional tea product called mieng it is located east of chiang mai province about 50 kilometers from the city average 1 300 meters above the sea level it has been about 100 years since the first generation of this village that had been searching for suitable places for tea cultivation came from nearby areas to settle in the location and started to form the community now the village has 134 households and 374 people in total the village consists of six clusters pang nok pang klang pang khon pang ton pan nai no 1 and pang nai no 2 the strategies and practical approaches for socio economic development are undergoing systemic changes under the influence of new developments in global economic systems and markets the most significant factors influencing such changes are connected to the start of the fourth industrial revolution industry 4 0 which is impacting all economic systems to a greater or lesser extent the creation of the digital economy and transition to industry 4 0 particularly increases the significance of hi tech for socio economic development secondly there is now a transition underway from a period of unlimited globalization and comprehensive integration to more limited globalization and selective economic integration the growing importance of regionalization on the global economic system is manifested in the formation and rapid development of new integration unions at the regional or country level e g the eu and the eaeu and company level e g regional sectoral economic clusters special economic areas technological parks and innovative networks thirdly there is an urgent need for faster innovation which leads to the formation of more innovative economies the global financial crisis drew attention to the problems of managing sustainability and achieving balance in socio economic development the formation and exponential growth of the information society based on digital technologies is now stimulating the growth and significance of corporate social and environmental responsibility as a prerequisite for entrepreneurial success thus the paradigm of socio economic development is changing from absolute rationality economic effectiveness and stability which has historically been associated with problems of stagnation to responsibility limited and socially oriented rationality and dynamism quick innovative development based on leading technologies this book aims to provide a scientific substantiation for this new paradigm this study explores the major patterns of change in the evolution of financial crises as enduring phenomena and analyzes the paradoxical position that crises are at once similar to and different from each other brenda spotton visano examines economic psychological and social elements intrinsic to the process of capitalist accumulation and innovation to explain the enduring similarities of crises across historical episodes she also assesses the impact that changing financial and economic structures have on determining the specific nature of crises and the differential effect these have in focal point manner and extent of transmission to other otherwise unrelated parts of the economy financial crises offers a consistent method for interpreting variations in financial crises through time and allows for a better overall appreciation for both the transitory fragility and enduring flexibility of financial capitalism and the potential vulnerability created by on going financial development topical and informative this key book is of keen interest to all those studying and researching international economics and political economy this book addresses the interrelationship between economic and financial crises the responses thereto and economic and social rights through a deep examination of what has become known as the preston model this book explores an innovative approach to local economic development that utilises economic democratisation to realise both social and economic objectives the first part of the book examines the main strands of the preston model framework and what makes it different to other urban regeneration schemes the combination of local anchor institution procurement to generate and retain local wealth and the development of cooperatives to fill gaps in local supply chains the chapters in this section consider the preston model as viewed through different lenses politics and society community economics democracy trade unionism language and communication education and transferability the second part explores the
influences and applications of the preston model in theory and practice in selected locations and various circumstances worldwide this includes discussion of key ideas such as economic democracy social enterprise and the creation of capacity for cooperative self government alongside essays on prominent international examples of similar approaches which can inform and in turn be informed by the preston model this book is essential reading for those interested in regional and national policy economic democracy and alternative economic and political ideas this book focuses on the socio economic and education factors impacting american political systems it covers topics such as cultural conditioning cultural lies stigmas racial hate homegrown terrorism entitlement political interactions cognitive theory diversity and racism this report summarises the results of work at the nordiska afrikainstitutet nordic africa institute nai on the impact of structural adjustment implementation on the economies states and societies of sub saharan africa it consists of two essays and an appendix listing research projects which have been are being carried out under the auspices of nai the first essay raises a series of conceptual and methodological questions in the context of a presentation of some of the main empirical results obtained from extended field work carried out during the course of 1992 and 1993 in kenya tanzania and zimbabwe the second essay presents the three main themes private trading networks and structures the changing political economy of land and popular forms of social provisioning that constitute the core of the second phase of nai's structural adjustment research and in so doing provides a review of aspects of the adjustment literature this report is therefore an attempt both at stock taking and agenda building as part of a wider quest for deepening our understanding of the structures and processes of socio economic change associated with the crisis and adjustment years in contemporary africa
Socio-Economic Development: Concepts, Methodologies, Tools, and Applications
2018-11-02
The social and economic systems of any country are influenced by a range of factors including income and education as such it is vital to examine how these factors are creating opportunities to improve both the economy and the lives of people within these countries socio economic development concepts methodologies tools and applications provides a critical look at the process of social and economic transformation based on environmental and cultural factors including income skills development employment and education highlighting a range of topics such as economics social change and e governance this multi volume book is designed for policymakers practitioners city development planners academicians government officials and graduate level students interested in emerging perspectives on socio economic development

International Development
2018-01-17
International development is a comprehensive inquiry into the field of socio economic development founded on an understanding that economic advancement involves transformation of society it explores successful developmental strategies but also tries to identify factors behind failed endeavours and the human costs associated with them the book evaluates the role played by influential agents of development such as the state and its institutions authoritarian leaders international organizations donor agencies non governmental organizations civil society activists and private business actors key features a multi disciplinary approach taking into account politics economics sociology cultural aspects and history of development examines a breadth of different theoretical approaches and their practical applications presents both mainstream and critical viewpoints addresses such complex issues as governability processes rights of the poor colonial legacy armed conflict environmental sustainability gender relations foreign aid urbanization rural development and international trade suggested further reading list at the end of each chapter this well balanced book will be a key text for students and practitioners working in the area of socio economic development and more broadly in development studies the politics of development and international political economy

Human and Technological Progress Towards the Socio-Economic Paradigm of the Future
2020-08-24
This book develops a socio economic paradigm of the future in the context of digital transformation the challenge of economic openness is considered through the globalization of the world economic system by the example of modern russia the tendency of archaization of socio economic relations is explored which is connected with the gradual disappearance of ineffective institutes and their replacement by new institutes attention is paid to the regional aspect of the digital economy perspectives of development of the ethno economy in the context of integration of regional economic systems are determined the problem of preserving social identity and supporting the uniqueness of competitive advantages of the region s economy in the conditions of digitization is actualized and its perspective solutions based on a region s globalization management are offered also the problem of national and regional food security is considered increased social significance of the agro industrial complex and the necessity for its de economization on the platform of the digital economy are substantiated a new concept of the market economy in the conditions of digitization and the fourth industrial revolution is developed economic power of technological progress and possibilities of managing and re directing this power are determined the authors substantiate the transition to the sixth technological mode and the related transformation processes in the economy also the authors dwell on the problem of the shadow economy and corruption and consider the perspectives of its overcoming based on the possibilities of digital technologies the idea of de regulation based on the possibilities of automatization and ai is opposed to the idea of increase of state regulation based on ubiquitous computing and digital monitoring of economic activities the perspectives of increasing the economy s transparency in the digital age are proved the alternatives to the current model of development of the digital economy are given and scenario analysis of consequences of observing these models based on the cognitive approach is performed new opportunities for development of the integration processes in entrepreneurship in the conditions of the digital economy are shown in
particular in the aspect of inter regional and transnational sectorial clustering clusters are considered as growth points of the russian economy and the new russian experience of formation and development of clusters in the sphere of higher education in the context of region s economy is studied the authors determine the contribution of key technological events in the development of entrepreneurship through the example of modern russia they come to the conclusion that despite the unique possibilities digital technologies do not necessarily create additional value for entrepreneurship and their application could be ineffective due to additional capital expenditures in case of complexity of return of long term venture investments the needs of entrepreneurship for innovative infrastructural provision in the context of the digital economy are determined and barriers on the path of its creation and practical application due to necessity for applying new forms of business organization are shown specific features of state management of a region s economy in the conditions of digital modernization are shown and the modern russian practice of e government as a response to the modern challenges is studied the authors outline new perspectives of development of public private partnership as an effective direction of industrial and cluster policy of a modern region

**The Shaping of Socio-economic Systems** 1986 first published in 1986 routledge is an imprint of taylor francis an informa company

**Econometric Evaluation of Socio-Economic Programs** 2022-11-02 this book provides advanced theoretical and applied tools for the implementation of modern micro econometric techniques in evidence based program evaluation for the social sciences the author presents a comprehensive toolbox for designing rigorous and effective ex post program evaluation using the statistical software package stata for each method a statistical presentation is developed followed by a practical estimation of the treatment effects by using both real and simulated data readers will become familiar with evaluation techniques such as regression adjustment matching difference in differences instrumental variables regression discontinuity design and synthetic control method and are given practical guidelines for selecting and applying suitable methods for specific policy contexts the second revised and extended edition features two new chapters on some recent development of difference in differences specifically chapter 5 introduces advanced difference in differences methods when many times are available and treatment can be either time varying or fixed at a specific time chapter 6 introduces the synthetic control method a treatment effect estimation approach suitable when only one unit is treated both chapters present applications using the software stata

**The Future of Economic and Social Rights** 2019-04-11 captures significant transformations in the theory and practice of economic and social rights in constitutional and human rights law

**Human and Technological Progress Towards the Socio-Economic Paradigm of the Future** 2020-08-24 this book determines the specific features of socio economic transformations of various spheres of the national economy with a focus on the financial system it considers the development of industrial holdings in the electric energy sphere and also studies the influence of technology on fish farming in modern russia the global factors of using digital technologies at the municipal level during creation of green and smart cities are analyzed the perspectives of development of tourism in the digital economy from the positions of supply and demand and are determined the specifics of development of agricultural production in the age of digital transformations by the example of modern russia are outlined and smart agricultural platform which allows for multiple increase of the agro industrial complex s efficiency is developed new possibilities and need in reformation of the international monetary system in the conditions of the fourth industrial revolution are determined the problems and perspectives of development of eurasian stock markets in the modern economic conditions under the influence of wide distribution of digital technologies are systematized specific features of the evolution of the forms of money from gold to crypto currencies are are distinguished specific features of benchmarking of depreciation of currencies inflation under the influence of globalization and regionalization of the international monetary system are
determined the authors present a concept of the banking system of the future in the conditions of macro economic instability which stimulates financial crisis management of the national economy and determine the role of banks in aggregation and redistribution of monetary resources in economy in the context of digital transformations also attention is paid to social consequences of digital modernization of the financial system transformation of human s social life in the age of innovative banking is shown effectiveness of online banking as a new form of payments that is popular in the digital economy is analyzed the authors formulate competencies that employees of banks of the future which will function in the digital economy should have and study the perspectives of digitization of the practice of tax administration based on technological processing and analytics of big data by the example of experience of modern russia as well as related transformation processes in the existing practice of the tax system organization a concept of organization and management of the national tax system in the conditions of robotization of production and consumption is developed and the role of blockchain technologies in improvement of the modern russian tax system is determined the investment platform for the modern digital economy is offered as a result the scientific paradigm of formation of the digital financial system in the conditions of industry 4 0 is formed

Socio-Economic Insecurity in Emerging Economies 2014-06-05 taking a unique comparative approach to the respective development paths of india brazil and south africa ibsa this book shows that people and governments in all three countries are faced with similar challenges of heightened insecurity caused by liberalization and structural adjustment the ways in which governments as well as individuals and worker organisations in ibsa have responded to these challenges are at the core of this book the book explores the nature of insecurity in the global south the nature of the responses to this insecurity on public and small scale collective as well as individual level the potential of these responses to be more than neo liberal mechanisms to govern and contain the poor and lessons to be learnt from these three countries the first section covers livelihood strategies in urban and rural areas as individual and small scale collective response to the condition of insecurity insecurity in the countries of the south is characterised by a high degree of uncertainty of the availability of income opportunities the second section looks at state responses to insecurity and contributions on social protection measures taken by the respective ibsa governments the third section discusses whether alternative development paths can be identified the aim is to move beyond denunciatory analysis livelihood strategies as well as public policies in some of the cases allow for the building of new spaces for agency and contestation of a neo liberal mainstream which provide emerging and experimental examples the book develops new thinking on northern welfare states and their declining trade unions it argues that these concepts knowledge and policy innovations are now travelling in three directions from north to south from south to north and between southern countries this book provides unique insights for researchers and postgraduate students in development studies social policy and industrial sociology

Truths and Half Truths 2011-06-30 truths and half truths is aimed at economic and social science academics and students who are interested in the dynamics of china s institutional development and societal transformation covering the complexity of the social economic and governance reforms behind the economic miracles achieved by china since its reform in 1978 and particularly in the past twenty years this book provides much needed insight and critical thinking on major aspects of china s reform topics include employment environment anti poverty urbanization and rural development education corruption political regime and media readers will be able to re evaluate the costs and benefits of china s modernization from a point of view of sustainability written by highly knowledgeable and well respected academics in law and economics with decades of experience in china studies provides an insight from academic points of view written in a reader friendly journalistic style an integrated monograph each chapter addresses a particular area of reform and can be read independently

European Socio-Economic Integration 2012-12-06 economic integration is one of
the most noteworthy issues in international economic policy at the end of the twentieth century the recent examples of the European Union EU and the North American Free Trade Association NAFTA have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia. This volume showcases research from an international array of researchers to provide a basic understanding of the current issues, problems, challenges, and opportunities for achieving integration addressing both empirical and theoretical aspects of such topics as monetary union, social policy reform, and social union public finance and technology policy. The chapters in part 1 are focused primarily on economic issues while part 2 covers on social policy, the welfare state, and political reforms with a particular emphasis on the European Union. Among the questions addressed, what are the main determinants and implications for socio-economic integration, how can economic policy influence the growth and integration process, why is innovation important for regional economic development, what has been the policy response so far, and what lessons have we learned from it, and finally, what are our action lines for the future?

Socio-Economic Foundations of the Russian Post-Soviet Regime

2016-05-03 Simon Kordonsky divides the social structure of contemporary Russia into distinct estates or social groups and describes each organization's unique resource-based political and economic nature as he guides readers through Russia's peculiar service and support estate system. Kordonsky reveals how remarkably effective inventing and institutionalizing threats can be in the distribution of scarce resources in a social system of this kind. His book emphasizes the fundamental differences between resource-based economies and traditional risk-based economies and their role in Russia's future.

Socio-Economics and Political Development in South Asia

2004 This book presents recent research studies on mapping and spatial analysis of socio-economic and environmental indicators used by various national and international contributors to regional development projects. It gathers the best contributions to the 1st International Conference on Mapping and Spatial Analysis of Socio-Economic and Environmental Indicators for the Local and Regional Sustainable Development. The conference was held in Southern Tunisia Tataouine in March 2015.

The research studies focused on generating and analyzing indicators in various domains of agriculture, energy, industry, tourism, transport, urban planning, exploitation of natural resources, infrastructure, health, environment, education, information and communication technologies, social affairs, and employability. Socio-economic and environmental indicators are important in regional development plans and strategies as they allow one to observe and analyze changes in economic growth and to measure their impact on the environment and on social networks. The daily life of citizens based on well-defined geomatic approaches and particularly through sophisticated digital mapping and spatio-temporal analyses. Authors focused on retrieving indicators to evaluate the exploitation rate of natural resources, intensity of energy consumption in various economic sectors, net migratory flows, quality checking of the air in urban areas, adaptation to climate change, and vulnerability of the coastal domain and risk of marine submersion due to sea level rise. The book is of interest not only to investors and contributors to regional development projects but also to all relevant policy-makers.

Mapping and Spatial Analysis of Socio-economic and Environmental Indicators for Sustainable Development

2019-08-24 This book is designed to explore the following challenges and imperatives for African countries in the twenty-first century. Liberalization of commercial and industrial activities in a deliberate effort to make them the preserve of the private sector generation of an appropriate industrial and trade strategy, nurturing technological development, redressing the debt burden, curbing industrial strife, protection of the fragile natural environment, and reconsideration of the size and functions of government.

Socio-economic Challenges

2004 Trends in cleaner business decisions have resulted in sustainable business models involving society stakeholders and consumers. Sustainable choices of companies create competitive differentiations that enable consumers to weigh social values and shift loyalties in the
competitive marketplace this book focuses on sustainability as the pivot of marketing and argues that commitment to sustainability in business not only equips companies to have greater social impact but also inspires an emotional response in consumers that aids companies in growing their image brands and socio political reputations exploring topics such as the circular economy sustainable logistics eco innovation conscious consumption and social entrepreneurship the chapters discuss sustainable practices in emerging markets and co creation between corporations and consumers this book offers researchers innovative concepts on sustainable business modelling

Sustainable Businesses in Developing Economies 2020-10-26 this open access book provides a comprehensive analysis of the socioeconomic determinants of covid 19 from the end of 2019 until presently the world has been ravaged by the covid 19 pandemic although the cause of this is obviously a virus the extent to which this virus spread and therefore the number of infections and deaths was largely determined by socio economic factors from this it follows that the course of the pandemic varies greatly from one country to another this observation applies both to countries resilience to such a pandemic which is mainly rooted in the period preceding the outbreak of the virus and to the way in which countries have reacted to the virus including the political choices on how to respond meanwhile research has made it clear that the nature of this response e.g elimination policy mitigation policy and proceeding herd immunity was on the one hand strongly determined by political and ideological factors and on the other hand was highly influential in the factors of success or failure in combating the pandemic the book focuses on the situation in a number of western regions notably the usa the uk and the eu and its member states the author addresses the reasons why in many western countries both pandemic prevention and response policies to covid 19 have failed the book concludes with recommendations concerning the rearrangement of the socio economic order that could increase the resilience of western societies against such pandemics

Covid-19 and Capitalism 2022-04-22 social regeneration is about the transformative processes that through institutional choices that embody cooperation and inclusion develop opportunities and capabilities for weak categories and transversally for society the challenge of social regeneration can be addressed in part through organisational solutions increasingly identified with social economy organisations since they are characterised by a social objective cooperation and inclusive democratic governance besides the organisational element social regeneration and local development provides a new perspective on interacting socio economic factors which can work in synergy with the social economy organisations model to promote and sustain social regeneration and well being such elements include civic engagement and social capital the nature of the welfare system the use of physical assets in urban and rural areas leadership technology and finance by analysing organisational and contextual elements this book offers an institutional perspective on how socio economic systems can reply to challenges such as social and environmental degradation financial crises immigration inequality and marginalisation

Social Regeneration and Local Development 2017-11-22 much of guyana s 20th century history was defined by the pnc dictatorship and the political and economic wreckage it left behind in guyana s great economic downswing 1977 to 1990 dr ramesh gampat presents a comprehensive study of these specific years when the national economy contracted by 2.7 percent annually he explores the multiple facets of the country s political tribalism which does not value freedom liberty and the flourishing of all people it values only freedom liberty and flourishing of tribes the study reinforces the widely held belief that until and unless these adversarial groups subsume their respective selfish interests and commit to the common cause of national peace and development the great downswing might not rest as a historical event but could well re emerge with further economic devastation if the lessons go unheeded dr gampat makes a strong case for federalism as a solution to guyana s ethnic politics federalism he posits would ensure that all guyanese have equal access to opportunities and resources since a system of provincial governance would be better placed to address discriminatory policies and practices at a localised level with the country sitting on the cusp of transformative development to be propelled by
new found oil wealth there is an urgency to settle the divisive politics if every guyanese is to benefit fairly and equitably from the economic boom guyana's great economic downswing 1977 to 1990 offers up a studied and comprehensive analysis that should be part of that bipartisan discourse going forward ryhaan shah novelist social activist a few piecemeal academic articles analyzing guyana's economic evolution over the period 1977 to 1990 were written but they are scattered and lost away in various journals what was missing is a comprehensive and rigorous exploration of the era of cooperative socialism dr ramesh gampat's book fills this gap it is a superb synthesis of historical theoretical and econometric exploration of the great downswing the book not only provides estimates of important macroeconomic concepts such as guyana's total factor productivity and long term growth but also produces the useful statistics and reviews of poverty inequality life expectancy education outcomes as well as a detailed analysis of the rice sector as if these are not enough gampat sets the tone by situating the exploration in the country's long standing and debilitating ethno political dynamics this self contained book will be of tremendous use to policy makers journalists and students interested in the historical context of present day outcomes i highly recommend this book to public libraries and home reference libraries tarron khemraj william and marie selby professor of economics and international studies new college of florida

Guyana’s Great Economic Downswing, 1977-1990 2020-10-19 in this fascinating and challenging work the author analyses the way water for drinking is produced distributed owned acquired and consumed in contrasting ways in different settings from the taken for granted all purpose water flowing out of taps in advanced economies to extreme inequalities of access to water of variable qualities drinking water tells its own interesting story but also reflects some of the centrally important characteristics of the state and economies of the different countries from sparkling mineral water in germany to drinking water garages in taiwan from water tankers in mexico city to street vendors in delhi markets comparisons are made to stretch our understanding of what we mean by an economy quality and property rights of water in addition the study of socio economics of drinking water provides a route into understanding interactions between polity economy and nature one of the major themes of the book is to analyse the sociogenic nature of sustainability crises of economies of water in their environmental settings epidemics droughts pollution land subsidences and floods overall it develops an economic sociology neo polanyian approach in a comparative and historical exploration of water for domestic consumption

Drinking Water: A Socio-economic Analysis of Historical and Societal Variation 2015-09-25 at home in the netherlands uses a range of indicators to describe developments in the integration of non western migrants and their children in the netherlands attention is focused on the situation of non western children in education the position of non western migrants on the labour and housing markets their representation in the crime figures and their degree of socio cultural integration the book also looks at civic integration the mutual perceptions of the non western and indigenous populations and the life situation of young people with a non western background

Market as a Weapon 2011 waqf is one of the most potent socio economic tools for reducing public sector deficit and breaking the chain of intergenerational poverty providing a high level discussion on waqf development and innovation within the context of modern socio economic and legal developments this book examines the importance and potentials of waqf and the issues relating to its legal and regulatory framework the research delivers future directions for countries that plan to explore this socio economic institution readers and policymakers will be able to replicate successful experiments and learn from some failed initiatives to seek alternative funding platforms to support the fiscal policies of developing countries the volume discusses the relevance and novel application of waqf in the modern economic system and social development it reviews applicable laws and regulations pertaining to waqf and trust laws and examines critical cross country case studies and experiences setting an agenda for further researchers in the field of waqf this comprehensive high level analysis with case studies from leading jurisdictions across the world is

tribals socio economic and cultural perspective
a key resource for researchers policymakers and institutions interested in charitable endowments islamic finance and social finance

Waqf Development and Innovation 2021-11-29 the great financial crisis of 2008 and the ensuing global economic and financial turmoil have launched a search for models for recovery the advocates of austerity present the baltic states as countries that through discipline and sacrifice showed the way out of crisis they have proposed the baltic model of radical public sector cuts wage reductions labor market reforms and reductions in living standards for other troubled eurozone countries to emulate yet the reality of the baltic austerity fix has been neither fully accepted by its peoples nor is it fully a success this book explains why and what are the real social and economic costs of the baltic austerity model we examine each of the baltic states by connecting national level studies within a european and global political economy thereby delivering comparative breadth that supersedes localized understandings of the crisis thus for each of the three baltic states individual chapters explore the different economic and social dimensions of neo liberal post communism and the subsequent wider global economic and financial crisis in which these newly financialized economies have found themselves especially vulnerable the austerity model adopted by baltic national governments in response to the crisis reveals the profound vulnerabilities created by their unwavering commitment to liberalized economies not least in terms of the significant exit of their labor forces and consequent population loss this book looks beyond basic financial metrics claiming a success story for the baltic austerity model to reveal the damaging economic and social consequences first of neo liberal policies adopted during transition and latterly of austerity measures based on internal devaluation combined these policies undermine the possibility of longer term recovery and even social and economic sustainability not to mention prospects for successful integration in the now faltering european project that has departed from its social model roots

The Contradictions of Austerity 2014-04-24 this book focuses on how important massive information is and how sensitive outcomes are to information in this century humans now are coming up against the massive utilization of information in various contexts the advent of super intelligence is drastically accelerating the evolution of the socio economic system our traditional analytic approach must therefore be radically reformed in order to adapt to an information sensitive framework which means giving up myopic purification and the elimination of all considerations of massive information in this book authors who have shared and exchanged their ideas over the last 20 years offer thorough examinations of the theoretical ontological basis of complex economic interaction econophysics and agent based modeling during the last several decades this book thus provides the indispensable philosophical scientific foundations for this new approach and then moves on to empirical epistemological studies concerning changes in sentiments and other movements in financial markets

Economic Foundations for Social Complexity Science 2017-09-25 resilience is a value that unfolds over a lifetime and has shown to be expressed in different ways and by different disciplines the book covers a total review and reflections of resilience role in creating better socio economy the author targets to provide practitioners researchers and change community leaders a roadmap to boost resilience economy and resilience engineering and manage their existence this work is essential for better withstanding adverse shocks and reducing the economic costs associated with weak economic structures through ability to absorb disturbances and bouncing back while continuing to function with resilient economy the world would witness more harmony while enhancing its capacity to respond to sudden crisis something that is worth exploring more in today s daunting conditions

Understanding the Power of Resilience Economy 2018-01-13 this book provides the latest empirical data on the three forms of resilience informality solidarities and unpaid care work it uncovers and quantifies these three forms of resilience that are generally invisible or ill recognised whereas these play a major role in the livelihoods of poor and vulnerable populations the book shows how the slow but constant unveiling of these forms over the past four decades has
gradually changed our vision of progress and development and is impacting the norms and concepts that shape our vision of the economy and society the book also emphasizes the role of informal economy through explaining the origins of the concept its definitions and the methods of data collection and measurement as such the book will be of interest to students researchers and policy makers in population studies economics and international development

**Dimensions of Resilience in Developing Countries** 2019-02-11 showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour the contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement these chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women the authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic by contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena this book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena

**Analysis of Socio-Economic Conditions** 2022-09 this open access book examines how childhood social disadvantage influences young adult demographic decision making and later life economic and well being outcomes this book in particular focuses on testing whether the consequences of childhood social disadvantage for adult outcomes differ across societies and whether these differences are shaped by the context of opportunities that societies offer to diminish the adverse impact of economic and social deprivation the book integrates a longitudinal approach and provides new insights in how the experience of childhood disadvantage e g low parental socio economic status family disruption influences demographic decisions in adulthood e g the timing of family events such as cohabitation marriage or parenthood the risk of divorce or having a child outside a partner relationship the exposure to later life loneliness poor health and economic adversity moreover using a cross national comparative perspective it investigates whether the relationships of interest differ across nations and tests the context of opportunities hypothesis arguing that the links between childhood disadvantage and adult outcomes are weakened in societal contexts offering good opportunities for people to escape situations of deprivation to do so the book analyzes national contexts based on economic prosperity family values and norms and welfare state arrangements

**Socio-economic and cultural impacts of COVID-19 on Africa** 2020-07-21 showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour the contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement these chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women the authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic by contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena this book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena
now a reality and a nightmare all over the world on march 11 2020 the world health organization who declared the coronavirus disease a k a covid 19 a pandemic as it spread in a short time all over the world the coronavirus disease has already affected life in many countries in the long term it is predicted that it will bring about changes that are quite likely to be permanent along with the measures taken on prevention and control of the spread of the outbreak international supply chains supply demand balance consumer and producer behavior business methods working models education methods and daily life are changing the concern for all countries needs to be researched in different aspects the covid 19 crisis has caused considerable damage in every aspect of life we believe that different socio economic aspects need to be discussed by scholars involved in academia and people who are interested in contributing to this new topic the world is facing this book comprises nine chapters including topics related to several impacts and challenges that covid 19 brought about on economy education social life trade geopolitical relations and what is more important on our health care systems we realize that this editorial book will lead a way to policy makers implementers researchers students and those who are interested in learning more about covid 19 impacts all over the world we hope and believe that it will be widely read as socrates said the secret of change is to focus all of your energy not on fighting the old but on building the new now it s our turn to focus on our new normal new reality and we are all in this together

Analysis of Socio-economic Conditions 2021 the second edition of a bestseller quantitative methods and socio economic applications in gis previously titled quantitative methods and applications in gis details applications of quantitative methods in social science planning and public policy with a focus on spatial perspectives the book integrates gis and quantitative computational methods and demonstrates them in various policy relevant socio economic applications with step by step instructions and datasets the book demonstrates the diversity of issues where gis can be used to enhance the studies related to socio economic issues and public policy see what s new in the second edition all project instructions are in arcgis 10 2 using geodatabase datasets new chapters on regionalization methods and monte carlo simulation popular tasks automated as a convenient toolkit huff model 2sfca accessibility measure regionalization garin lowry model and monte carlo based spatial simulation advanced tasks now implemented in user friendly programs or arcgis centrality indices wasteful commuting measure p median problem and traffic simulation each chapter has one subject theme and introduces the method or a group of related methods most relevant to the theme while each method is illustrated in a special case of application it can also be used to analyze different issues for example spatial regression is used to examine the relationship between job access and homicide patterns systems of linear equations are analyzed to predict urban land use patterns linear programming is introduced to solve the problem of wasteful commuting and allocate healthcare facilities and monte carlo technique is illustrated in simulating urban traffic the book illustrates the range of computational methods and covers common tasks and major issues encountered in a spatial environment it provides a platform for learning technical skills and quantitative methods in the context of addressing real world problems giving you instant access to the tools to resolve major socio economic issues

SOCIO-ECONOMIC IMPACTS AND CHALLENGES OF COVID-19 2021-02-01 this book analyzes the impact of migration on the lives of multiple generations of 2000 turkish families exploring education marriage fertility friends attitudes and religiosity it reveals transformations and continuities in the lives of migrants and their families in europe when compared to their non migrant counterparts in turkey

Quantitative Methods and Socio-Economic Applications in GIS, Second Edition 2017-08-02 this book is the first to be dedicated entirely to the european semester a new framework for policy coordination across european union eu member states the semester represents a major advancement in eu governance created in 2010 in the wake of the financial and sovereign debt crises and revamped in 2015 it was intended to provide a new socio economic governance
architecture to coordinate national policies without transferring legal sovereignty to eu level the papers in this collection are written by authors who have already contributed to this literature and have conducted original research for their studies the book offers an empirical and theoretical assessment of the european semester examining its implications along three critical axes running respectively between the economic and the social the supranational and the intergovernmental and the technocratic and democratic poles of eu governance the book concludes that the european semester challenges established theoretical understandings of eu governance as it is a prime example of the complexity that supersedes simple polar oppositions the chapters were originally published in a special issue of the journal of european public policy

**Intergenerational consequences of migration** 2016-04-29 introduction starting from the 1950s thailand had experienced unprecedented economic boom in the nation s history until the 1980s the average annual growth in the 1960s was 8 7 in the 1970s and 4 6 in the beginning of the 1980s 1 thai people especially those who are in the nation s capital bangkok enjoyed the economic boom and started to have modernized lifestyle however behind the scene of the national economic success rural villages were forced to face predicament because of the urbancentered industrial economy based on neo liberal economic beliefs in light of the historical context of the relationship between thai community and the high powered state authority examining one specific community which is struggling to find a way of development in the globalized world today will be of great help to understand the contemporary notion of rural development in thailand in this paper focus is centered on a village called mae kampong which has been under great influence of the royal project and the government in terms of development and yet has a great deal of potential for achieving a selfreliant way of community governance because of its traits as a traditional agrarian rural community this paper aims to examine the socio cultural changes that occurred in the village over the course of the contemporary development and ultimately the outlook of community self sufficiency and selfreliance deploying a realistic and empirical approach to look at the thailand s contemporary phenomena happening in the rural communities mae kampong is the third village of seven villages in huai kaew sub district mae on district chiang mai province northern thailand known as a major producer of northern thai traditional tea product called mieng it is located east of chiang mai province about 50 kilometers from the city average 1 300 meters above the sea level it has been about 100 years since the first generation of this village that had been searching for suitable places for tea cultivation came from nearby areas to settle in the location and started to form the community now the village has 134 households and 374 people in total the village consists of six clusters pang nok pang klang pang khon pang ton pan nai no 1 and pang nai no 2

**EU Socio-Economic Governance since the Crisis** 2019-12-01 the strategies and practical approaches for socio economic development are undergoing systemic changes under the influence of new developments in global economic systems and markets the most significant factors influencing such changes are connected to the start of the fourth industrial revolution industry 4 0 which is impacting all economic systems to a greater or lesser extent the creation of the digital economy and transition to industry 4 0 particularly increases the significance of hi tech for socio economic development secondly there is now a transition underway from a period of unlimited globalization and comprehensive integration to more limited globalization and selective economic integration the growing importance of regionalization on the global economic system is manifested in the formation and rapid development of new integration unions at the regional or country level e g the eu and the eaeu and company level e g regional sectoral economic clusters special economic areas technological parks and innovative networks thirdly there s an urgent need for faster innovation which leads to the formation of more innovative economies the global financial crisis drew attention to the problems of managing sustainability and achieving balance in socio economic development the formation and exponential growth of the information society based on digital technologies is now stimulating the growth
and significance of corporate social and environmental responsibility as a prerequisite for entrepreneurial success thus the paradigm of socio economic development is changing from absolute rationality economic effectiveness and stability which has historically been associated with problems of stagnation to responsibility limited and socially oriented rationality and dynamism quick innovative development based on leading technologies this book aims to provide a scientific substantiation for this new paradigm

**The Village in Transition 2018-02-02** this study explores the major patterns of change in the evolution of financial crises as enduring phenomena and analyzes the paradoxical position that crises are at once similar to and different from each other brenda spotton visano examines economic psychological and social elements intrinsic to the process of capitalist accumulation and innovation to explain the enduring similarities of crises across historical episodes she also assesses the impact that changing financial and economic structures have on determining the specific nature of crises and the differential effect these have in focal point manner and extent of transmission to other otherwise unrelated parts of the economy financial crises offers a consistent method for interpreting variations in financial crises through time and allows for a better overall appreciation for both the transitory fragility and enduring flexibility of financial capitalism and the potential vulnerability created by on going financial development topical and informative this key book is of keen interest to all those studying and researching international economics and political economy

**New Institutions for Socio-Economic Development 2021-04** this book addresses the interrelationship between economic and financial crises the responses thereto and economic and social rights

**Financial Crises 2012-12-15** through a deep examination of what has become known as the preston model this book explores an innovative approach to local economic development that utilises economic democratisation to realise both social and economic objectives the first part of the book examines the main strands of the preston model framework and what makes it different to other urban regeneration schemes the combination of local anchor institution procurement to generate and retain local wealth and the development of cooperatives to fill gaps in local supply chains the chapters in this section consider the preston model as viewed through different lenses politics and society community economics democracy trade unionism language and communication education and transferability the second part explores the influences and applications of the preston model in theory and practice in selected locations and various circumstances worldwide this includes discussion of key ideas such as economic democracy social enterprise and the creation of capacity for cooperative self government alongside essays on prominent international examples of similar approaches which can inform and in turn be informed by the preston model this book is essential reading for those interested in regional and national policy economic democracy and alternative economic and political ideas

**Economic and Social Rights after the Global Financial Crisis 2014-10-09** this book focuses on the socio economic and education factors impacting american political systems it covers topics such as cultural conditioning cultural lies stigmas racial hate homegrown terrorism entitlement political interactions cognitive theory diversity and racism

**The Preston Model and Community Wealth Building 2021** this report summarises the results of work at the nordiska afrikainstitutet nordic africa institute nai on the impact of structural adjustment implementation on the economies states and societies of sub saharan africa it consists of two essays and an appendix listing research projects which have been are being carried out under the auspices of nai the first essay raises a series of conceptual and methodological questions in the context of a presentation of some of the main empirical results obtained from extended field work carried out during the course of 1992 and 1993 in kenya tanzania and zimbabwe the second essay presents the three main themes private trading networks and structures the changing political economy of land and popular forms of social provisioning that constitute the core of the second phase of nai s structural adjustment
research and in so doing provides a review of aspects of the adjustment
literature this report is therefore an attempt both at stock taking and agenda
building as part of a wider quest for deepening our understanding of the
structures and processes of socio economic change associated with the crisis
and adjustment years in contemporary africa
Socio-economic and Education Factors Impacting American Political Systems
