scientists offer personal accounts of the challenges, struggles, successes, u-turns, and satisfactions encountered in their careers in industry, academia, and government. This insightful book offers essential life and career lessons for newly minted STEM graduates and those seeking a career change. Thirty-six leading scientists and engineers, including two Nobel Prize winners, describe the challenges, struggles, successes, satisfactions, and u-turns encountered as they established their careers. Readers learn that there are professional possibilities beyond academia as contributors describe the paths that took them into private industry and government as well as to college and university campuses. They discuss their varying preferences for solitary research or collaborative teamwork, their attempts to achieve work-life balance, and unplanned changes in direction that resulted in a more satisfying career. Women describe confronting overt sexism and institutional gender bias, and scientists of color describe the experience of being outsiders in their field. One scientist moves from startup to startup, enjoying a career of serial challenges, another spends decades at one university, and another has worked in academia, industry, and government. even if you think you don’t need any help with your life, I am sure there is someone in your orbit that you love that does. By understanding the principles and information in this book, you can help them, and I believe almost everyone has someone they wish to help. It is frustrating when you want to help but don’t know how that might not be enough reason for you to want to buy this book. So let’s go into what you learn from it. We all are governed by the rules of the spirit world. I call these rules AVP: the alternate viewpoint system. You will not only learn how the spirit world operates but what to expect when you get there. I think that piece of information would be valuable, since fear of death is really fear of the unknown. This book was my task from before my previous life as Elizabeth Reilly. Yes, my veil was lifted in 1989. I had a need to know. You see, so that brings us to the most important obstacle to using AVP: the entire system is predicated on the fact that we have all lived before. That’s why I couldn’t proceed until Sharon Holt did her job. Yes, that was a planned event when you accept the fact that you have lived before, you can also...
accept that you are in the proper place to learn lessons, the real reason we are here that means you don't need to be jealous, envious, covetous or do anything harmful against anyone. If you read this book, you will know how to fight temptation and desire. You will learn to purge your past of negative traits, then of course, you will learn how to purge the negative out of your heart and replace it with love, kindness, humility, and forgiveness—vital for a pure heart and required to get into heaven.
