what makes teaching a moral endeavor how can we prepare classroom practitioners for engaging in that moral endeavor in meaningful and effective ways this volume brings together leading scholar who draw upon both their academic expertise and substantial wisdom of practice
to offer a variety of perspectives on the challenge of preparing today's teachers for the moral work of teaching. Book features examine the role that teacher preparation and development can play in addressing the moral work of teaching, highlighting the work of leading scholars from educational psychology, educational philosophy, and teacher education. These insights provide compelling insights for identifying the next generation of our nation's best teachers. Contributors include Wolfgang Althof, Karen D. Benson, Marvin W. Berkowitz, Donald Blumenfeld, Jones Elizabeth Campbell, Julie Canniff, Mary Crawford, Lana Daly, Rebecca Evers, Cathie Fallona, Gary Fenstermacher, Anthony Holter, Lisa E. Johnson, Daniel Lapsley, Darcia Narvaez, Virginia Navarro, Larry Nucci, Joy Pelton, Virginia Richardson, Don Senneville, David Shields, Barbara Stengel, Jonathan W. Vare, Marilyn Watson, Matthew Sanger, and more. Contributors are associated with universities such as Idaho State University and Boise State University.

The editors and contributors help us appreciate that many teachers come to the work precisely because of abiding moral commitments to help others make something back to society. They also help us see how crucial it is to give candidates systematic support in coming to grips with the meaning of these commitments and how to translate them into pedagogical action for the well-being of students and society alike. From the foreword by David T. Hansen, this book sheds light into the core of professional morality. It should be a must for each student teacher and for each practitioner around school life. Fritz Oser, Professor of Education and Educational Psychology, University of Fribourg, Switzerland, explains what this means for teachers and teacher educators. The combination of conceptual analysis and cases of teacher education practice make this book a valuable resource and welcome antidote to the current preoccupation with test scores. Sharon Feiman-Nemser, Brandeis University.

This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement. This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices. The book also considers the arguments against teacher involvement, e.g., the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts, the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover, teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices.

High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students.
