Learn how to conduct a patient centered health history and physical examination. Seidel's guide to physical examination an interprofessional approach 10th edition takes a uniquely interprofessional collaborative approach to health assessment with a strong emphasis on lifespan considerations and differential diagnosis of unexpected findings. Each core chapter is organized into four sections: anatomy and physiology, review of related history, examination and findings, and abnormalities with lifespan content integrated into each area. Written by a team of nurse practitioners and physicians, this one-of-a-kind textbook uses evidence-based guidelines to help you master hands-on exam techniques as well as communication skills that build rapport and trust with the patient. Unique interprofessional collaborative approach is written by two advanced practice nurses and three physicians providing balanced expertise in both pediatric and adult geriatric health. Unique integrated lifespan content provides separate sections in each chapter for infants and children, adolescents, pregnant patients, and older adults. Unique compassionate patient-centered approach emphasizes developing good communication skills, use of effective hands-on examination techniques, and reliance on clinical reasoning and clinical decision making skills. Unique strong emphasis on social inclusiveness and patient centeredness incorporates LGBTQ patients and providers with special emphasis on cultural competency. History taking and special considerations for examination of the breasts, female and male genitalia, reproductive health, thyroid, and the anus rectum prostate. Unique cross references to Dains' Advanced Health Assessment Clinical Diagnosis in Primary Care help you take the next step in clinical reasoning and also develop diagnostic reasoning skills.
