This book contains three full length verbal and quantitative practice tests to prepare students in grades 6 and above to take the advanced school and college ability test SCAT administered by the Johns Hopkins Center for Talented Youth CTY. It is an above grade level test that assesses math and verbal reasoning abilities among gifted children and assesses students at a higher grade level than the one they are in at the time the test is administered. Advanced SCAT tests are designed for grades 9 to 12. The two sections for testing math and verbal reasoning are each 22 minutes long, separated by a 10 minutes break, and there are 55 multiple choice questions per section.

The MET GO is a standardized international examination designed by Michigan Language Assessment and aimed at beginner to intermediate level adolescent language learners. A1 to B1 of the Common European Framework of Reference for Languages CEFR, the test assesses general English language proficiency in educational, social, and everyday contexts and emphasizes the ability of the test taker to communicate effectively in English. The MET GO is intended for early adolescents at the middle school to lower secondary school level who want to measure their general English language proficiency in a variety of linguistic contexts. The test results can be used for educational purposes such as when finishing an English language course as a motivational tool to encourage students as they progress in their English study or as a supporting credential for youth opportunities requiring English skills. It may also be used as a bridge to a higher level exam such as the MET. The teacher’s answer pack for the official MET GO practice test book includes answer keys, audio transcripts for the listening practice tests, writing test responses with commentary for two of the practice tests, examiner instructions, and script for the speaking test prompts. Selected practice test vocabulary lists, a progress tracking log for recording practice test scores, actual test form instructions, and a sample answer sheet. The audio for the listening practice tests can be accessed at press umich edu elt comosite metgo.

you with an accurate and complete representation of the SAT II Chemistry Subject Test. Inside, you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II Chemistry Test. Following each test, you will find an answer key with detailed explanations designed to help you master the test material about the test, what is used for students planning to attend college, and the SAT II Chemistry Subject Test for one of two reasons: 1) because it is an admission requirement of the college or university to which they are applying or 2) to demonstrate proficiency in chemistry. The SAT II Chemistry Exam is designed for students who have taken one year of college preparatory chemistry. The test is administered by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country and is designed and implemented to ensure that the content and difficulty level of the test are appropriate when should the SAT II Chemistry be taken if you are applying to a college that requires subject test scores as part of the admissions process. You should take the SAT II Chemistry Subject Test toward the end of your junior year or at the beginning of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring of your senior year. For more information, be sure to contact the colleges to which you are applying when and where is the test given? The SAT II Chemistry Subject Test is administered five times a year at many locations throughout the country, mostly high schools. To receive information on upcoming administrations of the exam, consult the publication taking the SAT II Subject Tests, which may be obtained from your guidance counselor or by contacting College Board SAT Program, P.O. Box 6200, Princeton, NJ 08541-6200. Phone: 609-771-7600, website: collegeboard.com. There is a registration fee. Yes, there is a registration fee to take the SAT II Chemistry. Consult the publication taking the SAT II Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations; to find out if you qualify and to register for assistance, contact your academic advisor. How to use this book? What do I study first? Remember that the SAT II Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II Chemistry Subject Test. To begin your studies, read over the review and the suggestions for test-taking. Take one of the practice tests to determine your areas of weakness and then restudy the review material focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II Chemistry Subject Test. When should I start studying? It is never too early to start studying for the SAT II Chemistry Test. The earlier you begin, the more time you will have to sharpen your skills. Cramming is not an effective way to study since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the test.
exam format of the SAT II Chemistry

The SAT II Chemistry is a one-hour exam consisting of 85 multiple-choice questions. The first part of the exam consists of classification questions that present statements or questions that you must match up with a group of choices lettered A through E. Each choice may be used once or more than once or not at all. The exam then shifts to relationship analysis questions, which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first. The last section is composed strictly of multiple-choice questions with choices lettered A through E.

3. Integration: Inferring information and drawing conclusions from particular relationships (35%)

Studying for the SAT II Chemistry:

It is very important to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day while waiting on line or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it. When you take the practice tests, try to make your testing conditions as much like the actual test as possible. Turn off your television and radio and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer as you complete each practice test score and thoroughly review the explanations to the questions you answered incorrectly. However, do not review too much at any one time. Concentrate on one problem area at a time. Review the questions and explanations and by studying our review until you are confident you completely understand the material. Keep track of your scores by doing so. You will be able to gauge your progress and discover general weaknesses in particular sections. Study the reviews that cover your areas of difficulty as this will build your skills in those areas. Test taking tips:

- Although you may be unfamiliar with standardized tests such as the SAT II Chemistry subject test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam when you are practicing to take the SAT II Chemistry subject test. Simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself after simulating the test. Only a couple of times will boost your chances of doing well. You will be able to sit down for the actual exam with much more confidence.

score: 1

Gauge your progress and discover general weaknesses in particular sections. Study the reviews that cover your areas of difficulty as this will build your skills. Stay calm and pace yourself. Boost your chances of doing well. Sit down for the actual exam with much more confidence.
ensure that you are familiar enough with the SAT II Chemistry subject test to avoid nervousness and the mistakes caused by being nervous. Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams if you are unsure of an answer. Guess wisely by using the process of elimination. Go through each answer to a question and rule out as many of the answer choices as possible by eliminating three answer choices. You give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces. The machine may score your answer incorrectly if you have finished working on a section. You may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test. Whether it is graded by machine or by hand, you do not have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section. So you need to work quickly and steadily. Avoid focusing on one problem for too long before the test. Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day. Your admission ticket, two forms of identification (e.g., driver’s license, student identification card, or current alien registration card). Two no 2 pencils with erasers. Directions to the test center. A watch if you wish but not one that makes noise as it may disturb other test takers. On the day of the test, you should wake up early after a good night’s rest and have breakfast. Dress comfortably so that you are not distracted by being too hot or too cold while taking the test. Also plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test. And will also spare you the stress of being late if you arrive after the test begins. You will not be admitted to the test center and you will not receive a refund if you are late. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. If you have completed the SAT II Chemistry subject test, you may hand in your test materials and leave. Then go home and relax. When will I receive my score report? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information.
