International Relations 2010

The public visibility of Islam is becoming increasingly controversial throughout European countries with case studies drawn from France, Germany, Italy, Spain, and the UK. This book examines a range of public issues including mosque construction, ritual slaughter, Sharia councils, and burqa bans, addressing the question of Islamic difference in public life outside the confines of established normative discourses that privilege freedom of religion, minority rights, or multiculturalism. Acknowledging the creative role of dissent, it explores the manner in which public controversies unsettle the religious-secular divide and reshape European norms in the domains of aesthetics, individual freedom, animal rights, and law. Developing an innovative conceptual framework and elaborating the notion of controversy as a methodological tool, Islam and public controversy in Europe draws our attention to the processes of interaction, confrontation, and mutual transformation, thereby opening up a new horizon for rethinking difference and pluralism in Europe as such it will appeal to scholars across the social sciences with interests in religion, integration, cultural difference, and the public sphere.

International Relations 2012

In recent years, phenomenal developments have taken place in the field of international relations with the disintegration of the union of Soviet Socialist Republics (USSR) bipolar world has given place to a unipolar world with the United States playing a dominating role in world affairs. The functioning of the United Nations Organisation has been under great strain, particularly because of the behaviour of the United States under the regime of George W. Bush. The United States has been flouting the provisions of the United Nations. A recent example of this is the unilateral action taken by it in Iraq in spite of strong opposition from the United Nations and many other countries. Likewise, it has recently brushed aside some good international agreements, for example on nuclear testing, World Criminal Court, land mines, etc., and dismissed some others like the Kyoto Convention on Global Warming with an insouciance unbecoming to the world's biggest producer of greenhouse gases. Furthermore, it has been dominating the United Nations organisations like the World Bank, International Monetary Fund, International Finance Corporation, etc. The grant of loans by the financial international institutions is considerably influenced by the United States instead of being guided strictly by commercial and financial prudence. The United Nations undoubtedly and urgently needs to reform, resurrect, and update. Moreover, the terrorist attack on September 11, 2001, on the World Trade Center and Pentagon has shaken the idea of security and its military, economic, political, and societal considerations. World over, question on military capability and security and state's ability to guarantee security and the citizen's right to it have come into focus as never before in the interest of national survival. National security has become a prominent concern of states. The present book focuses on all contemporary issues of global significance it aims at addressing.
ambitious themes such as the international security situations reforms of united nations india’s international relations the changing socio politico economic situation and equations increasing terrorism and shrinking moral and ethical values in the new millennium it is hoped that the volumes would be found useful by the students researchers and teachers of world affairs and international relations even the parliamentarians and government executives concerned with india’s foreign policy and international relations would find them useful it will prove informative and interesting to general readers keen to know about the current developments in the field of international relations

**Controversies in Analytical Psychology 2003**

This collective volume focuses on two closely connected issues whose common denominator is the embattled notion of the subject. The first concerns the controversies on the nature of the subject and related notions such as the concepts of I and self from both theoretical and historical viewpoints. Several of the contributors show how different and incompatible perspectives on the subject can help us understand today's world, its habits, style, power relations, and attitudes for this purpose. Use is made of insights in a broad range of disciplines, such as sociology, psychoanalysis, pragmatics, intellectual history, and anthropology. This interdisciplinary approach helps to clarify the multifaceted character of the subject and the role it plays nowadays as well as over the centuries. The second issue concerns the subject in interpersonal as well as in intra personal controversies. The enquiry here focuses on the ways in which different aspects of the subject and subjective differences affect the conduct, content, and rationality of controversies with others as well as within oneself. On a variety of topics, among such aspects, the contributors analyse the subject's emotions, cognitive states, argumentative practices, and individual and collective identity. The interaction between the two issues—the controversies on the subject and the subject of controversies—sheds new light on the debate on modernity and its alleged crisis.

Now in its second edition, current controversies on family violence contain thoughtful, often heated discussions that highlight the most current controversies in research and policy directions in the family violence area. This volume includes chapters by academic and public policy researchers, therapists, lawyers, victim advocates, and educators. Some of the controversies in the first edition have been deleted while new ones have been added. Chapters in this second edition also are shorter and more accessible to readers who are not already experts in family violence.

The Communicative Ethics Controversy 1990

This book presents a constitutive approach to controversy based on a discourse analysis of news texts focusing on the role of journalists as participants who shape public controversy for readers.
drawing data from the reuters corpus the project identifies formulas that journalists use in reporting controversy and draws conclusions about how these serve professional and textual functions and how they shape public controversy as a natural historical and pragmatic event while the traditions of dialectic and rhetoric have focused on the prescriptive aim of training participants to resolve controversies in philosophical dialogue or public debate settings this orientation has tended to preempt questions about where controversy is located and how it is shaped this project contributes to descriptive ethnographic research about controversy using discourse analysis to address a problem in argumentation
