This book describes the author's childhood growing up on a farm living with four generations of family, including his sister, parents, grandparents, and great-grandparents. The author describes many varied experiences from helping his 90-year-old great-grandmother churn butter the old-fashioned way to helping his grandfather feed the pigs and other animals on the farm. He writes about his interactions with many of the other people who lived in the same community and some of the naughty things he and his friends did such as raiding apple orchards. This book gives the reader a clear idea of how life was on a farm in rural Quebec in the 1950s.

This book addresses the production practices employed in the production of food animals and animal products that enable marketers to sell a variety of products to meet consumer demand. Animal production practices have come under increased scrutiny by consumers who object to inputs and practices the industry has been a proponent of using technologies to reduce production costs resulting in lower priced meat and animal food products and now consumers are starting to look at other objectives. This book considers the key issues of concern to consumers including the treatment of animals, the use of antibiotics, feed additives, and hormones and how these are monitored, regulated, and communicated to consumers. It also reviews labeling and information provided to consumers including organic genetic engineering, welfare standards, and place of origin while the main focus is on the United States. There are descriptions of European practices and legislation overall it aims to provide an objective and balanced appraisal which will be of interest to advanced students and researchers in agricultural food and environmental economics, law and policy, and animal production and welfare. It will also be very useful for early career
professionals in the food and agricultural sectors
