an in depth look at the struggle between the charismatic rebel commander ahmad shah massoud the lion of panjshir and the soviet forces who fought to control the panjshir valley in afghanistan when the soviet forces rolled into afghanistan in 1979 they believed if they took the cities the country would follow they were wrong the red army found itself in a bloody stalemate in the afghan mountains in the strategically vital panjshir valley where they faced the most able and charismatic of the rebel commanders ahmad shah massoud the lion of panjshir time and again the soviet forces and their afghan counterparts sought to take control of the panjshir and time and again the rebels either rebuffed their clumsy attempts or ambushed and evaded them only to retake the valley as soon as moscow's attention was elsewhere over time the rebels acquired new weapons and developed their own tactics as did the soviets the panjshir was not just a pivotal battlefield it also shaped the subsequent afghan civil wars that followed soviet withdrawal and the military thinking that is still informing the new russian military featuring striking colour artwork battlescenes and detailed maps of the fighting this is a compelling study of one of the hardest fought struggles of the soviet war in afghanistan

the history of jehovah s witnesses in europe has always been one of persecution this third volume documents this history turning eastward for the first time the circumstances of a religious minority under different political systems can be compared across the continent the studies gathered here provide insight into the methods of repression used by governments and mainstream churches the survival strategies of jehovah s witnesses and their various experiences under eastern european dictatorships the initially cordial relationship with jehovah s witnesses that developed after 1990 has steadily reverted to religious discrimination culminating in russia s renewed ban of jehovah s witnesses in 2017 and the confiscation of
their properties by violating the universal human right of religious freedom the same conditions that prevailed in the soviet era have now returned to modern russia with severest discrimination and abusing jurisdictional procedures to reach their political aspirations the state tries to crush a religious community against this background it is all the more important not to turn a blind eye to the situation of religious minorities in eastern europe but instead to take an honest public stance against it

this thoughtful book describes the range of nationalist ideas that have taken root in Russia since 1856 drawing on a wide range of archival documents and unparalleled interview material from the post-soviet period. Tuminez analyzes two cases: Russian panslavism in 1856-1878 and great power nationalism in 1905-1914 when aggressive nationalist ideas clearly influenced Russian foreign policy and contributed to decisions to go to war. Yet, not all forms of nationalism have been malevolent, and the author assesses competing nationalist ideologies in the post-soviet period to clarify the conditions under which a particularly belligerent nationalism could flourish and influence Russian international behavior.

Born in the 1930s, the Soviet air force's long-range bomber arm, known initially as the ADD and later as the DA, proved itself during the Second World War and continued to develop in the immediate post-war years when the former allies turned Cold War opponents. When the strategic bomber Tu-4 was found to be too short-legged to deliver strikes against the main potential adversary, the USA, Tupolev and Myasishchev OKBs began the task by creating turbine-engined strategic bombers by the Khrushchev era in the mid-late 1950s. The Soviet defence industry and aircraft design bureaux set about adapting the bombers to take air-launched missiles for use against land and sea targets and in 1962 the DA fielded its first supersonic aircraft, the Tu-22 blinder twinjet, which came in pure bomber and missile strike versions. The Brezhnev years saw a resurgence of strategic aviation with the Tu-22M backfire swing-wing supersonic medium bomber entering service in the mid-1970s. The Tu-95MS Bear H and Tu-160 Blackjack which are capable of carrying six and 12 air-launched cruise missiles, respectively, show how the DA's order of battle changed in the period from 1945 to 1991. Major operations including the air arm's involvement in the Afghan War, the Cold War exercises over international waters in the vicinity of the potential adversary, and the shadowing of NATO warships are covered, together with details of air armies, bomber divisions, and bomber regiments, including their aircraft on a type-by-type basis over 500 photos most of which are previously unpublished in the West, supplemented by 61 colour profiles, colour badges, and line drawings of the aircraft and their weapons, making this an essential reference source for the historian and modeller alike.

This book provides essential information on the morphology, biology, phytochemistry, pharmaceutical prospects, evolution, phylogeny, biogeography, and taxonomy of Paris melanthiaceae, a morphologically distinctive plant genus with great economic importance since the establishment of this genus. Seventy species and 24 subspecific taxa have been described, resulting in considerable confusion in species delimitation. In this book, the
taxonomy of all described taxa is carefully revised based on multi disciplinary evidences a revised classification system of paris containing five
sections is outlined every species is provided with a concise but diagnostic description a color illustration photographs that highlight distinguishing
characters examined specimens and distribution range the interspecific relationships are clarified with an identification key this monograph offers
taxonomists evolutionary biologists ecologists horticulturalists phytochemists and practitioners a thorough and up to date overview about this
interesting plant group it is equally valuable for undergraduate and graduate students teachers and professionals engaged in related fields

antisemitism has had a long and complex history in russian intellectual life and has revived in the post communist era in their concept of the
identity of the jewish people many academics and other thinkers in russia continue to cast jews in a negative or ambivalent role an inherent rivalry
exists between russia and the jews because russians have often viewed themselves whether through the lens of atheistic communism or that of
the most conservative elements of the orthodox church as a chosen people whose destiny is to lead the way to world salvation in this book vadim
rossman presents the foundations and present influence of intellectual antisemitism in russia he examines the antisemitic roots of some major
trends in russian intellectual thought that emerged in earlier decades of the twentieth century and are still significant in the post communist era neo
eurasianism eurasian historiography national bolshevism neo slavophilism national orthodoxy and various forms of racism such extreme right wing
ideology continues to appeal to a certain segment of the russian population and seems unlikely to disappear soon rossman confronts and
challenges a range of disturbing sometimes contradictory but often quite sophisticated antisemitic ideas posed by russian sociologists historians

Aromatherapy is one of the most popular forms of natural therapies available to us. What makes essential oils so exciting is that they are the only plant-based remedies that work on all levels of our wellbeing: physical, emotional, mental, and spiritual. As an aromatherapy educator, I often notice how frustrated people become when they have to learn the individual properties and actions of essential oils. The aromatree identifies the relationships that exist between the individual essential oils and the different parts of a plant, such as leaves, roots, resin, wood, fruits, seed, or flowers. In aromatree, we examine the relationship and pattern between the botany of the plant, traditional folklore, symbolism, mythology of plants, aroma chemistry, pharmacology, essential oil safety, our psyche, our personality, the chakras, the energetics according to traditional Chinese medicine, and ayurveda. Blending tips, aromatree embraces all aspects of aromatherapy, whether you are a beginner or a professional aromatherapist. You will gain an incredible insight into using essential oils.

This book highlights recent findings in industrial manufacturing and mechanical engineering and provides an overview of the state of the art in these fields mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear, and lubrication in machines, surface transport, and technological machines manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems, and their industrial applications. Industrial mechatronics, automation, and robotics. The book gathers selected papers presented at the 4th International Conference on Industrial Engineering (ICIE) held in Moscow, Russia, in May 2018. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.

Applied photometry, radiometry, and measurements of optical losses reviews and analyzes physical concepts of radiation transfer providing a quantitative foundation for the means of measurements of optical losses which affect propagation and distribution of light waves in various media and in diverse optical systems and components. The comprehensive analysis of advanced methodologies for low loss detection is outlined in comparison with the classic photometric and radiometric observations having a broad range of techniques examined and summarized from interferometric and calorimetric resonator and polarization phase shift and ring down decay wavelength and frequency modulation to pulse.
separation and resonant acousto optic and emissive subsequently compared to direct and balancing methods for studying free space and 
polarization optics fibers and waveguides the material is focused on applying optical methods and procedures for evaluation of transparent

this work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the 
hypersonic railgun lasers and robotic weapons under development today weapons and warfare is designed to provide students with a 
comprehensive and highly informative overview of weapons and their impact on the course of human history in addition to providing basic factual 
information this encyclopedia will delve into the greater historical context and significance of each weapon the chronological organization by time 
period will enable readers to fully understand the evolution of weapons throughout history the work begins with a foreword by a top scholar and a 
detailed introductory essay by the editor that provides an illuminating historical overview of weapons it then offers entries on more than 650 
individual weapons systems each entry has sources for further reading the weapons are presented alphabetically within six time periods ranging 
from the prehistoric and ancient periods to the contemporary period each period has its own introduction that treats the major trends occurring in 
that era in addition 50 sidebars offer fascinating facts on various weapons numerous illustrations throughout the text are also included

One of the defining features of Systems Analysis And Design Elias M Awad is the arrangement of genres, forming a symphony of reading choices. As you travel through the Systems Analysis And Design Elias M Awad, you will encounter the complication of options — from the organized complexity of science fiction to the rhythmic simplicity of romance. This variety ensures that every reader, no matter their literary taste, finds ethnobotany lecture 25 a shipunov within the digital shelves.

In the domain of digital literature, burstiness is not just about diversity but also the joy of discovery. ethnobotany lecture 25 a shipunov excels in this dance of discoveries. Regular updates ensure that the content landscape is ever-changing, introducing readers to new authors, genres, and perspectives. The unexpected flow of literary treasures mirrors the burstiness that defines human expression.

An aesthetically attractive and user-friendly interface serves as the canvas upon which ethnobotany lecture 25 a shipunov depicts its literary masterpiece. The website’s design is a showcase of the thoughtful curation of content, providing an experience that is both visually appealing and functionally intuitive. The bursts of color and images blend with the intricacy of literary choices, shaping a seamless journey for every visitor.

The download process on ethnobotany lecture 25 a shipunov is a concert of efficiency. The user is greeted with a direct pathway to their chosen eBook. The burstiness in the download speed assures that the literary delight is almost instantaneous. This effortless process matches with the
human desire for fast and uncomplicated access to the treasures held within the digital library.

A crucial aspect that distinguishes ipcsit.com is its dedication to responsible eBook distribution. The platform strictly adheres to copyright laws, assuring that every download Systems Analysis And Design Elias M Awad is a legal and ethical undertaking. This commitment contributes a layer of ethical perplexity, resonating with the conscientious reader who values the integrity of literary creation.

ipcsit.com doesn't just offer Systems Analysis And Design Elias M Awad; it nurtures a community of readers.
