This new fifth edition of information resources in toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique wide-ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession, sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1 focuses on background resources and tools, arranged in 5 parts: part 1 begins with chapters on the science of toxicology, its history, and informatics framework; part 2 continues with chapters organized by more specific subject areas such as cancer, clinical toxicology, and genetic toxicology. The categorization of chapters by resource format for example, journals, newsletters, technical reports, organizations, and websites is also provided. Part 3 further considers toxicology's presence via the internet, databases, and software tools. The concluding part 5 covers miscellaneous topics such as laws, regulations, and the environment.

Volume 2 focuses on the global arena and offers contributed chapters focusing on the toxicology contributions of over 40 countries. It includes a glossary of toxicological terms and an appendix of popular quotations related to the field. The book is offered in both print and electronic formats. It is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications such as ethics, and the precautionary principle. Climate change and children's environmental health are also highlighted. This set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributed by experts and leaders in the field.

The Teacher's Almanac 1987

The comprehensive second edition of this popular series has been completely updated and revised for senior secondary students. It covers all 200 kanji characters required by the new Victorian study design.
