**Law, Practice and Politics of Forensic DNA Profiling 2022-12-30**

This collection reviews developments in DNA profiling across jurisdictions with a focus on scientific and technological developments as well as their political, ethical, and socio-legal aspects. Written by leading scholars in fields such as social studies of forensic science, science and technology studies, and socio-legal studies, the book provides state-of-the-art analyses of forensic DNA practices in diverse jurisdictions. It explores new and emerging forensic genetics technologies and the issues of legitimacy involved. The work articulates the various forms of technolegal politics involved in the everyday standardised and emerging practices of forensic genetics and engages with the most recent scholarly and policy literature in analyses of empirical cases. By taking into account the most recent technolegal developments, the book explores what it means to live in a world that is increasingly governed through anticipatory crime control and its related risk management and bio surveillance mechanisms. These mechanisms intervene with and produce political and legal subjectivities through human bodies, particularly in their DNA.

**Fighting for Rights 2011-02-23**

Leaders around the globe have long turned to the armed forces as a school for the nation. Debates over who serves continue to arouse passion today because the military's participation policies are seen as shaping politics beyond the military specifically the politics of identity and citizenship. Yet, how and when do these policies transform patterns of citizenship? Military service, Ronald R. Krebs argues, can play a critical role in bolstering minorities' efforts to grasp full and unfettered rights. Minority groups have at times effectively contrasted their people's battlefield sacrifices to the reality of inequity, compelling state leaders to concede to their claims. At the same time, military service can shape what and how minorities have engaged in political activism in the quest for meaningful citizenship. Employing a range of rich primary materials, Krebs shows how the military's participation policies shaped Arab citizens' struggles for first-class citizenship in Israel from Independence to the mid-1980s, and African Americans' quest for civil rights from World War II to the Korean War. "Fighting for Rights" helps us make sense of contemporary debates over gays in the military.
and over the virtues and dangers of liberal and communitarian visions for society it suggests that rhetoric is more than just a weapon of the weak that it is essential to political exchange and that politics rests on a dual foundation of rationality and culture

**Experiencing Animal Minds 2012-11-27**

in these multidisciplinary essays academic scholars and animal experts explore the nature of animal minds and the methods humans conventionally and unconventionally use to understand them the collection features chapters by scholars working in psychology sociology history philosophy literary studies and art as well as chapters by and about people who live and work with animals including the founder of a sanctuary for chickens a fur trapper a popular canine psychologist a horse trainer and an art photographer who captures everyday contact between humans and their animal companions divided into five sections the collection first considers the ways that humans live with animals and the influence of cohabitation on their perceptions of animals minds it follows with an examination of anthropomorphism as both a guide and hindrance to mapping animal consciousness chapters next examine the effects of embodiment on animals minds and the role of animal human interembodiment on humans understandings of animals minds final sections identify historical representations of difference between human and animal consciousness and their relevance to pre established cultural attitudes as well as the ways that representations of animals minds target particular audiences and sometimes produce problematic outcomes the editors conclude with a discussion of the relationship between the book s chapters and two pressing themes the connection between human beliefs about animals minds and human ethical behavior and the challenges and conditions for knowing the minds of animals by inviting readers to compare and contrast multiple uncommon points of view this collection offers a unique encounter with the diverse perspectives and theories now shaping animal studies

**Putting Logic in its Place 2004-11-04**

what role if any does formal logic play in characterizing epistemically rational belief traditionally belief is seen in a binary way either one believes a proposition or one doesn t given this picture it is attractive to impose certain deductive constraints on rational belief that one s beliefs be logically consistent and that one believe the logical consequences of one s beliefs a less popular picture sees belief as a graded phenomenon this picture explored more by decision theorists and philosophers of science than by mainstream epistemologists invites the use of probabilistic coherence to constrain rational belief but this latter project has often involved defining graded beliefs in terms of preferences which may seem to change the subject away from epistemic rationality putting logic in its place explores the relations between these two ways of seeing beliefs it argues that the binary conception although it fits nicely with much of our commonsense thought and talk about belief cannot in the end support the traditional deductive constraints on rational belief binary beliefs that obeyed these constraints could not answer to anything like our intuitive notion of
Epistemic rationality and would end up having to be divorced from central aspects of our cognitive practical and emotional lives but this does not mean that logic plays no role in rationality probabilistic coherence should be viewed as using standard logic to constrain rational graded belief this probabilistic constraint helps explain the appeal of the traditional deductive constraints and even underlies the force of rationally persuasive deductive arguments graded belief cannot be defined in terms of preferences but probabilistic coherence may be defended without positing definitional connections between beliefs and preferences like the traditional deductive constraints coherence is a logical ideal that humans cannot fully attain nevertheless it furnishes a compelling way of understanding a key dimension of epistemic rationality

Echoes of the Tambaran 2011-10-01

In the Sepik basin of Papua New Guinea ritual culture was dominated by the Tambaran a male tutelary spirit that acted as a social and intellectual guardian or patron to those under its aegis as they made their way through life to Melanesian scholarship the cultural and psychological anthropologist Donald F. Tuzin was something of a Tambaran a figure whose brilliant and fine grained ethnographic project in the Arapesh village of Ilahita was immensely influential within and beyond New Guinea anthropology Tuzin died in 2007 at the age of 61 in his memory the editors of this collection commissioned a set of original and thought provoking essays from eminent and accomplished anthropologists who knew and were influenced by his work they are Echoes of the Tambaran the anthology begins with a biographical sketch of Tuzin’s life and scholarship it is divided into four sections each of which focuses loosely around one of his preoccupations the first concerns warfare history the male cult and changing masculinity all in Melanesia the second addresses the relationship between actor and structure here the ethnographic focus momentarily shifts to the Caribbean before turning back to Papua New Guinea in essays that examine uncanny phenomena narratives about childhood and messianic promises the third part goes on to offer comparative and psychoanalytic perspectives on the subject in Fiji Bali the Amazon as well as Melanesia appropriately the last section concludes with essays on Tuzin’s fieldwork style and his distinctive authorial voice

this volume synthesizes and advances existing knowledge of consumer response to visuals representing an interdisciplinary perspective contributors include scholars from the disciplines of communication psychology and marketing the book begins with an overview section intended to situate the reader in the discourse the overview describes the state of knowledge in both academic research and actual practice and provides concrete sources for scholars to pursue written in a non technical language this volume is divided into four sections image and response illustrates the difficulty encountered even in investigating the basic influences processes and effects of mere exposure to imagery image and word presents instances in which the line between words and pictures is blurred such as the corporate logo which is often pictorial in nature but communicates on an abstract level usually attributed to words image and the ad contributes to our appreciation for the exquisite variations among advertising texts and the resultant variability in response not only to different ads but among different viewers of the same ad image and object carries the inquiry of visual response over the bridge toward object interaction having traveled a path that has gone from the precise working of the brain in processing visual stimuli all the way to the history of classical architecture readers of this volume will have a new respect for the complexity of human visual response and the research that is trying to explain it it will be of interest to those involved in consumer behavior consumer psychology advertising marketing and visual communication

**Practical Autonomy and Bioethics 2010-07-01**

this is the first volume in which an account of personal autonomy is developed that both captures the contours of this concept as it is used in social philosophy and bioethics and is theoretically grounded in and a part of contemporary autonomy theory james stacey taylor s account is unique as it
is explicitly a political one recognizing that the attribution of autonomy to agents is dependent in part on their relationships with others and not merely upon their own mental states the volume is distinctive in its examples which touch on the ethics of using inducements to encourage persons to participate in medical research the ethical issues associated with the use of antibiotics and the ethical basis for both patient confidentiality and informed consent

Dreaming of Justice, Waking to Wisdom 2023-03-14

a surprising look at how rousseau defended the philosophic life as the most natural and best of lives dreaming of justice waking to wisdom reveals what could be thought of as the capstone of rousseau s thought even if that capstone has been nearly invisible to readers despite criticizing philosophy for its corrosive effects on both natural goodness and civic virtue rousseau argues laurence d cooper held the philosophic life as an ideal cooper expertly unpacks rousseau s vivid depiction of the philosophic life and the case for that life as the most natural the freest or in short the best or most choice worthy of lives cooper focuses especially on a single feature arguably the defining feature of the philosophic life the overcoming of the ordinary moral consciousness in favor of the cognitivist view of morality cooper shows that rousseau with his particular understanding and embrace of the philosophic life proves to be a kind of latter day socratic thorough and thought provoking dreaming of justice waking to wisdom provides vital insight into rousseau

Constitutional Public Reason 2023-01-13
public reason which urges that only laws based on principles reasonably agreeable to all those bound by them are legitimate has rarely been applied to constitutional law and never in a comparative way this book aspires to fill that gap by studying the use of public reason in different constitutional systems in doing so it studies public reason both as a normative idea as a principle postulated for democratic constitutionalism and as a descriptive account as helping to understand many important doctrines in constitutional adjudication of some leading constitutional courts around the world and also in the supranational sphere constitutional public reason questions the performance of leading exemplars of public reasons including the top courts of the united states india canada australia germany and south africa as well as the european court of human rights it also attempts to show how this performance can be improved in fields such as freedom of expression non establishment of religion and anti discrimination law ultimately it finds that the best resonance between the ideal of public reason and constitutional interpretation is found in doctrines that locate the illegitimacy of laws in the wrongful motives or purposes pursued by legislators scrutinising motives is often as important as scrutinising consequences

activities like text editing watching movies or managing personal finances are all accomplished with web based solutions nowadays the providers need to ensure security and privacy of user data to that end passwords are still the most common authentication method on the web they are inexpensive and easy to implement users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance because they are tedious to create remember and maintain in many cases usability issues turn into security problems because users try to work around the challenges and create easily predictable credentials often they reuse their passwords for many purposes which aggravates the risk of
identity theft there have been numerous attempts to remove the root of the problem and replace passwords e.g. through biometrics however no other authentication strategy can fully replace them so passwords will probably stay a go to authentication method for the foreseeable future researchers and practitioners have thus aimed to improve users situation in various ways there are two main lines of research on helping users create both usable and secure passwords on the one hand password policies have a notable impact on password practices because they enforce certain characteristics however enforcement reduces users autonomy and often causes frustration if the requirements are poorly communicated or overly complex on the other hand user centered designs have been proposed assistance and persuasion are typically more user friendly but their influence is often limited in this thesis we explore potential reasons for the inefficacy of certain persuasion strategies from the gained knowledge we derive novel persuasive design elements to support users in password authentication the exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real world constraints here we investigate how mental models of password strength and password managers can provide important pointers towards the design of persuasive interventions moreover the associations between personality traits and password practices are evaluated in three user studies a meticulous audit of real world password policies shows the constraints for selection and reuse practices based on the review of context factors we then extend the design space of persuasive password support with three projects we first depict the explicit and implicit user needs in password support second we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies third we tried to empower users to create memorable passwords with emojis the results show the challenges and potentials of emoji passwords on different platforms finally the thesis presents a framework for the persuasive design of password support it aims to structure the required activities during the entire process this enables researchers and practitioners to craft novel systems that go beyond traditional paradigms which is illustrated by a design exercise
