Journal of the Senate, Legislature of the State of California 1942 seminar paper from the year 2009 in the subject business economics.
Abstract In contrast to a retailer or wholesaler in food retailing, a car dealer has no choice of his products. A car dealer who has a contract with a car manufacturer, for example, Mercedes-Benz, is only allowed to sell Mercedes-Benz cars. Only if the dealer has a contract with another car manufacturer can he sell those cars. The only way to distinguish car dealers is about their consultations and services. By using a good sales promotion, the dealer can amplify his consultations and services and gain new customers. This task offers an insight to sales promotion and shows how car dealers can use them. A good sales promotion requires good planning. It should contain an as-is analysis, i.e., the aims, the target group, and the strategy of sales promotion. You have also to plan how to reach the attention of the customers. This preparative work is not part of this task, but it is necessary for the success of the following measures.

The Dealer: 1 of 3 2018-10-31 Achieving excellence in dealer distributor performance offers in-depth management coaching in each of these areas: machinery sales, rentals, service parts, customer training, and retention. It is filled with practical programs to strengthen and increase profitability, cash flow, and customer retention. Improving an industrial equipment business has four requirements. 1. Measure the dealership against proper benchmark metrics. These 48 critical profit variables are covered in detail in this text. 2. Determine where you stand and find the gaps in your performance. Comprehensive self-assessment tools are provided. 3. Identify best practices of high-performance dealers. Recommendations are made for each business area. 4. Energize your company into a continuous improvement program. Numerous team discussion projects are included in the text. McDonald Group Institute for Dealer Development founder and author Walter McDonald has based this text on 40 years of experience in dealer management consulting and over 2,650 dealer management workshops. In many ways, this book is a written reflection of Walt’s live dealer management seminars. If you are familiar with his work, you know that he focuses on the real value generating activities of the business. He is in the trenches with the dealer managers and field sales and aftermarket reps who create real value and make it happen every hour of every day in the dealership. McDonald’s Dealer Management Guide is an absorbing refresher for informed senior executives and a highly useful handbook for those future dealer leaders and related OEM managers on the way up. This dealer guide actually contains two books: one book with benchmarks and advice on what the numbers mean and the second book on how to improve the numbers. This manuscript could have been subtitled real metrics, real solutions. The dealer distributor can analyze its business operations through the performance yardsticks presented in this timely publication. By Nick W.
