implement fsma congress will likely continue to monitor FDA's implementation of the law and provide oversight over how some provisions are carried out and enforced as well as FDA's coordination with other federal agencies such as those in USDA and the Department of Homeland Security under FSMA FDA is responsible for more than 50 regulations, guidelines, and studies; however, some FDA rules under FSMA have been substantially delayed and it is uncertain whether full implementation of some provisions in the law will meet their expected deadlines. Regulations were to have been proposed or in some cases finalized within one to two years of enactment, roughly January 2012 and January 2013. Given delays in the rulemaking process, the Center for Food Safety filed suit in federal court against FDA and the Office of Management and Budget citing the government's failure to implement several food safety regulations required by FSMA by early 2014. FDA had proposed a majority of the regulations that constitute the food safety framework under FSMA, but there are continued delays in some rules. Industry guidance and reports as required under the law. FDA also re-proposed some aspects of four major proposed rules in September 2014. FDA has agreed to a new court-ordered schedule for issuing final FSMA regulations for many of the major rules between 2015 and 2016. Congress may also continue to consider changes to other food safety laws and policies that continue to be actively debated among these are food safety initiatives covering meat, poultry, and seafood products legislation intended to curtail the non-medical use of antibiotics in animal feeds and to ban the use of certain plastic components commonly used in food containers. Food labeling, stricter food safety enforcement mechanisms, and the use of plant and animal biotechnology. Several of these issues were actively debated leading up to the passage of
fsma several bills debated in previous congresses were reintroduced in the 112th and 113th congress some in congress also might continue to advocate for additional policy reforms to existing fda or usda food safety laws to address other perceived concerns about the safety of the u s food supply
